## IoT innovations for the implementation of the European Health Data Space

Sergio Guillen, Mysphera Spain

**GLOBAL VISION:**

**IoT TODAY AND BEYOND**

**IOTForum**

# Panel

**Sergio Guillen**

Mysphera S.L.  
CInO

*Chairman*

**Matteo Melideo**

Engineering S.p.A.  
Research & Innovation Manager

*The GATEKEEPER approach to  
Data Federation*

**Claudio Caimi**

HPE Pointnext Italy  
Project Manager

*GATEKEEPER HPE  
Infrastructure  
for Health data space*

**Giuseppe Fico**

UPM  
Assistant Professor

*Trusted healthcare  
enabled dataspace: the  
PharmaLedger use  
cases*

**Xenia Beltran**

UPM  
Project Manager<sub>2</sub>

# The session topics

- ❑ This session addresses the implementation of real uses cases of European Health Data Spaces.
- ❑ European Data Space and EHDS is now a burning topics and strategic actions from the EU.
- ❑ There are almost 6 more session dealing with Data Spaces in the IoT conference. This one focuses on health data.
- ❑ GATEKEEPER is a H2020 project that aims at creating a Health Data Federation ecosystem for primary ad secondary use of health data for AI and Big Data applied to the prevention and management of chronic conditions.
- ❑ In this session we will discuss the approach and results of GK both, in the generic business models of a future marketplace of data for secondary use and the implementation of the secure infrastructure that will support such health data space.
- ❑ In addition we will discuss on other approach for specific data space for pharmacological data. It is the case of Pharmaledger project.
