## **Business Modelling for a Data Marketplace Backplane and a Data Pricing Model Tool**

Timoleon Farmakis

**GLOBAL VISION:**

**IoT TODAY AND BEYOND**

**IoTForum**

# Why did data marketplaces emerge?

- The total volume of data created, captured, copied and consumed worldwide is growing rapidly
- The use Data can changes the way companies generate value and significantly change even traditional industries.
- Businesses are realizing the importance of external data
- Security, trustworthiness and ease of data access remains a major challenge in the market

Big Data Market Size Projection

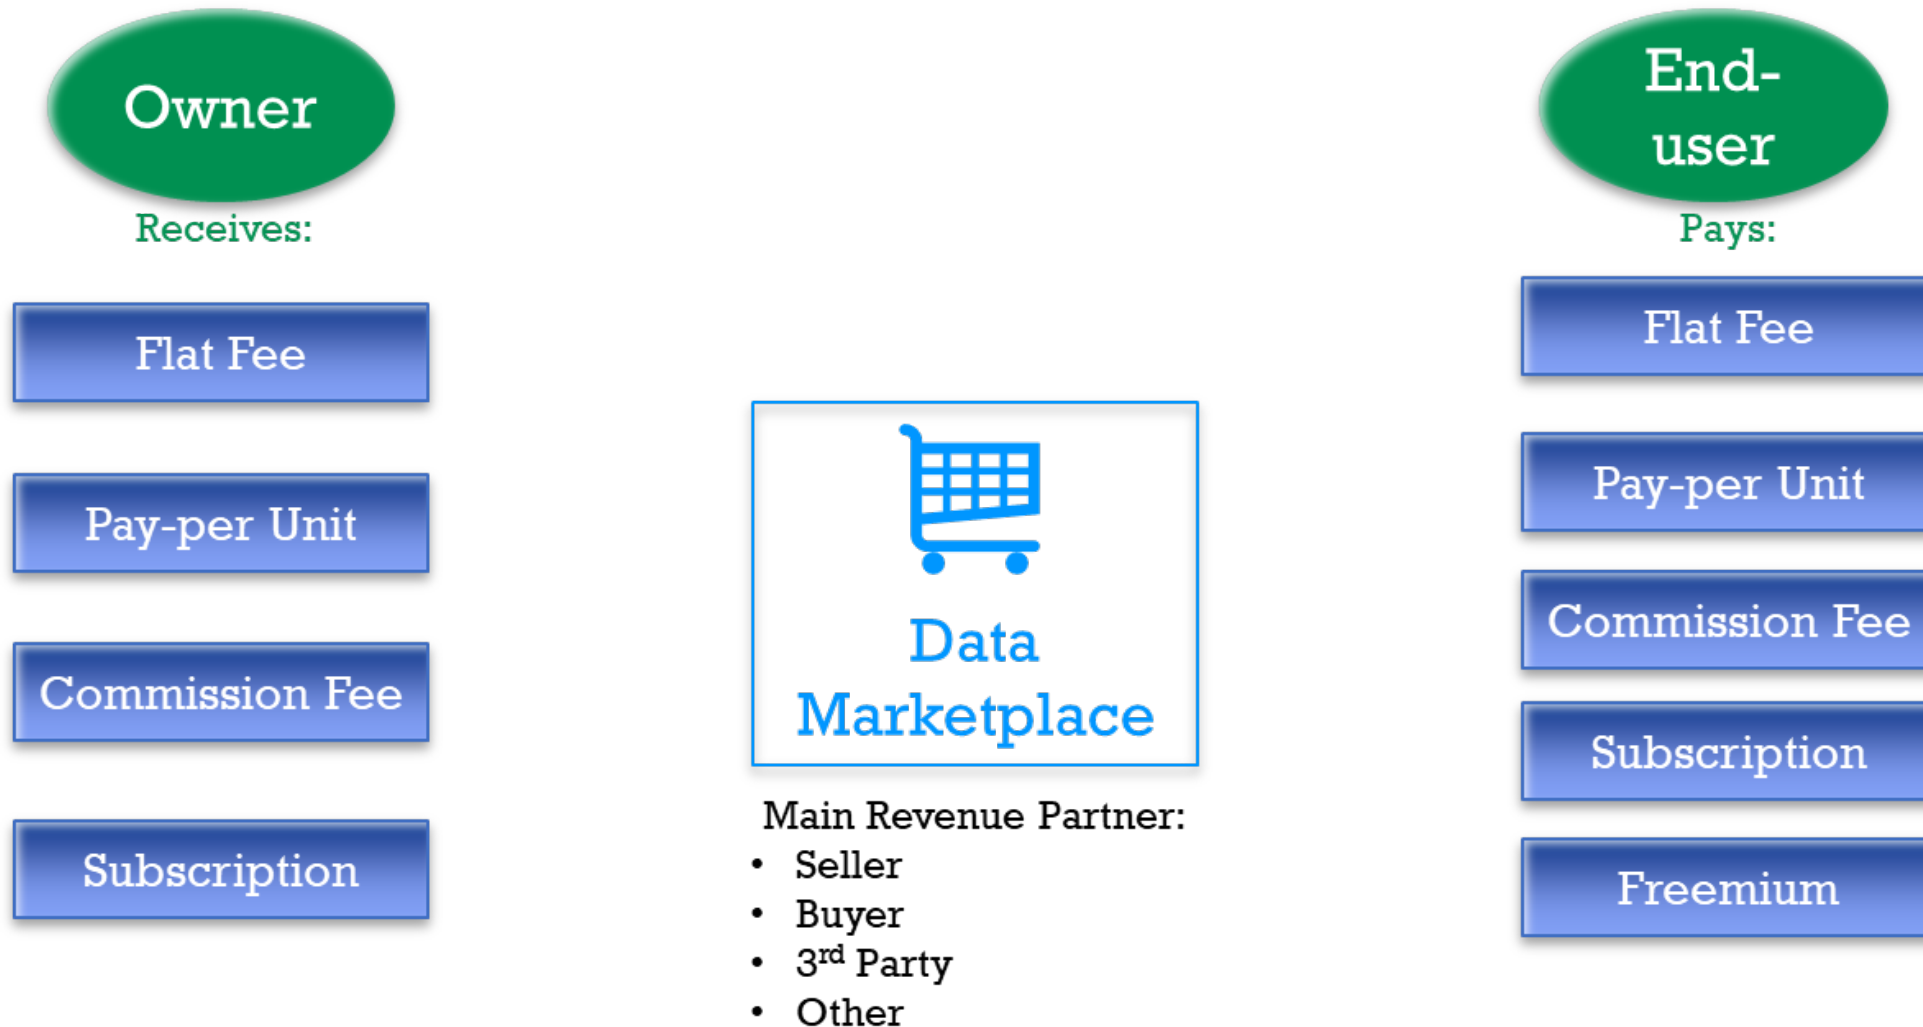

# The Role of Data-marketplaces

Data-marketplaces can be an enabler for both internal and external monetization by:

- Solving the “Chicken and Egg” problem
- providing an accessible avenue to commercialization;
- “absorbing” processes that are beyond a company’s core competencies;
- allowing owners to capture greater value and reinforcing their rights;
- easily demonstrating the financial incentives;
- allowing for broader synergies.

# Revenue model and commission fee

# Porter's Five Forces and i3 Market

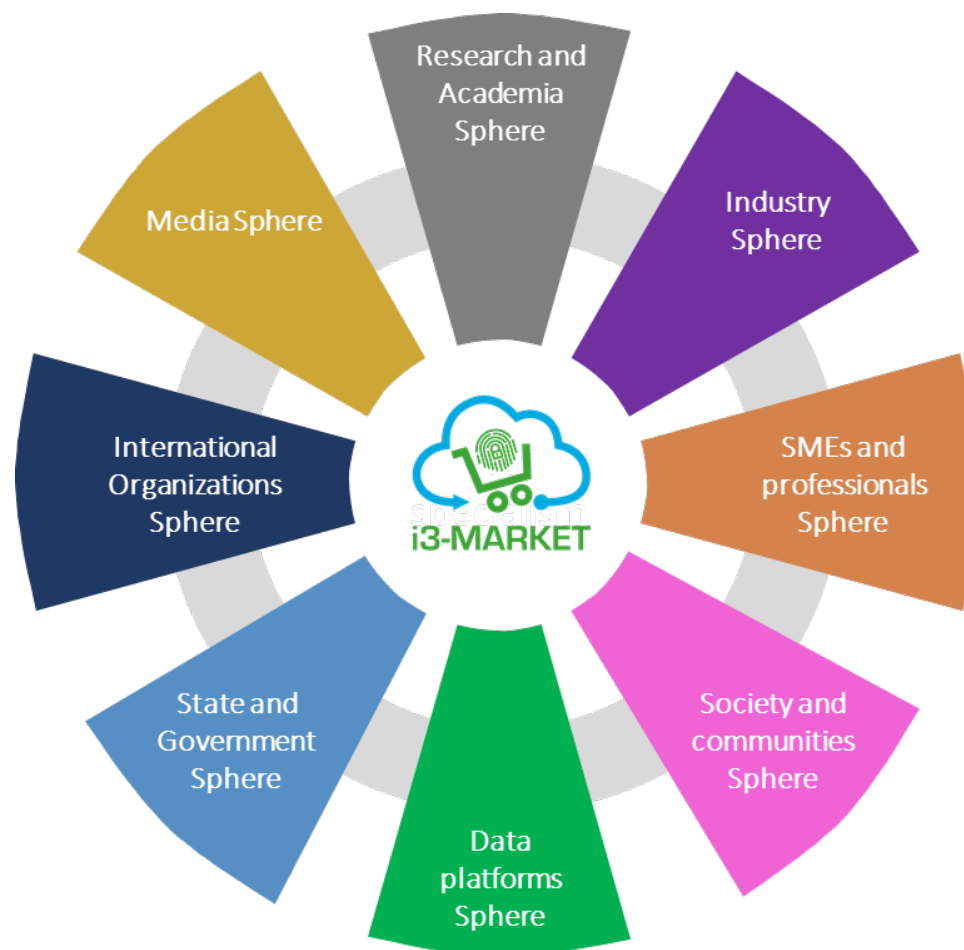

## Critical priorities

- Strengthen and enhance BM channels.
- Support new products and services.
- Establish a strong connection and manage critical stakeholders.
- Strengthen the i3-MARKET brand.

# i3 Market stakeholders

**IOTWeek**

Dublin — June 20-23, 2022

# i3 Market stakeholders

Open-source community	Telecommunication Companies	Other companies	European Union (EU)
Entrepreneurial Community	Internet Related Companies	SMEs	Council of Europe (CoE)
Individuals	Manufacturing Companies	Freelancer professionals	Organization for Economic Cooperation and Development
Data Marketplaces	Healthcare companies	National Governments	Researchers and Professors
Data Warehouses	Data Spaces	Municipalities	Digital/Online Media

# Our price recommendation calculator

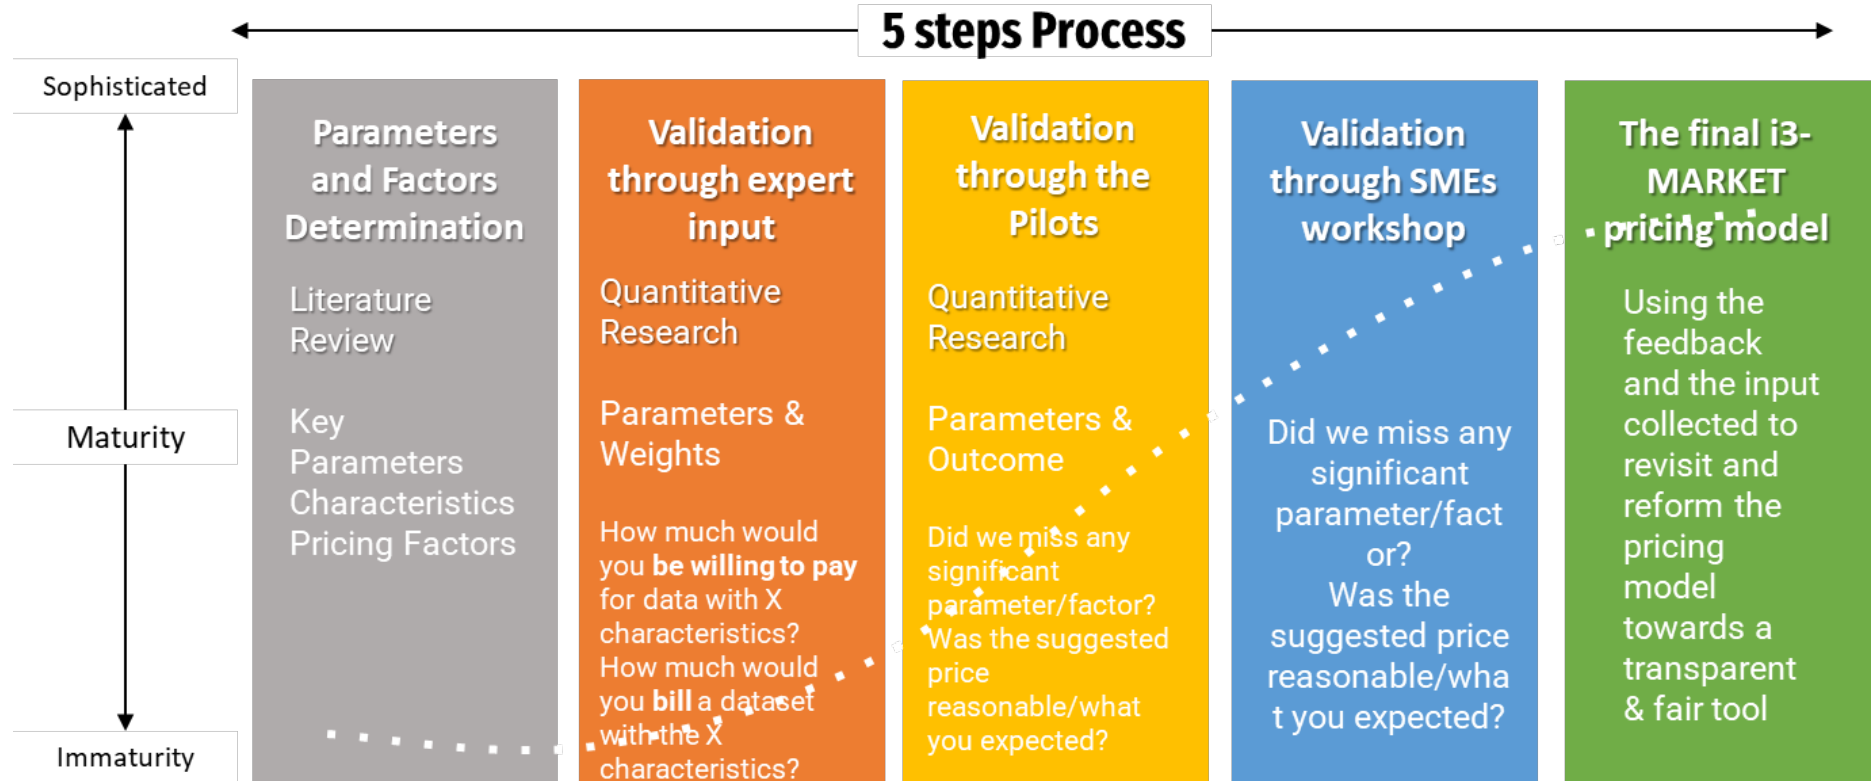

**IOTWeek**

Dublin — June 20-23, 2022

How can we make it more user friendly?

# Creation and Cross-validation Methodology

# Suggested Pricing Model parameters

Value-based parameters

Quality-based parameters

Cost-based parameters

Law and License-based parameters

# Our parameters in more detail...

COST OF  
COLLECTING,  
STORING OR/AND  
ANALYSIS

ESTIMATED VALUE  
FOR THE CONSUMER

DATA  
COMPLETENESS

DATA ACCURACY &  
VALIDITY

UNIQUE  
ENTRIES/VALUES

RARITY/SCARCENESS

TYPE OF LICENCES

CREDIBILITY OF THE  
SELLER

# How it works?

- A user-friendly pricing calculator
- Default parameters with specific weights that affect the final result
- Questions to assist the data provider/seller self scoring
- Scales in a user-friendly way
- The resulting value is a recommendation, and the user chooses whether to accept or modify it
