

HSbooster.eu The EU Standardisation Booster

Ray Walshe

EAG Chair HSBooster.eu Dublin City University

The HSbooster.eu has received funding from the European Union's Horizon Europe Framework Programme (HORIZON) - under grant agreement no 101058391.

HSbooster.eu – The essentials

- HSbooster.eu Standardisation Booster for H2020 and Horizon Europe Research Results
- Coordination & Support Action (101058391)
- April 2022 March 2024
- Caracteristic Representation Provide the second second
- HORIZON-WIDERA-2021-ERA-01-32 Standardisation Booster for fostering exploitation of FP-funded research results and managed by the European Research Executive Agency (REA).
- "A new service for EU research projects that want to ensure that their results create real impact by contributing to standards development. - Peter Droell, Director at the European Commission's Research and Innovation Unit
- Strong consortium with expertise and experience in standardisation, training and delivering EC Booster services

Our Experts will advise Horizon Europe and H2020 projects on how to contribute to standardisation in their field

- Backed and supported by experts with complimentary expertise and roles
 - Vertical sectors
 Technologies
 Standardisation
 Advisory roles
 Market needs
 Innovation

Chair – Ray Walshe, Dublin City University

EAG provides high-level strategic guidance and provides expert input into standardisation urgencies for open calls

Cluster Meeting for Smart Communities Projects

Objectives

HSbooster.eu in a nutshell

General Objective: To test a "standardisation booster" programme to facilitate European results in standardisation

Obj.1 EU Community

Obj.2 Serve H2020/HE Projects

Synergies

Obj.3 New standards development

Obj.4 Uptake of new technologies

Policy, Standards, and Synergies

- 3 impact reports
- 1 sustainability report
- 25+ MoUs signed

Reports

Service matrix

Sustainability report

 100+ measurable liaisons H2020-HE Projects/SDOs

• Interim & final call monitoring reports

Initial, intermediate and final impact reports

• Lessons learned & service report

• 500+ impacted standards

The HSbooster.eu Programme

- 1,000+ H2020/HE projects served overall
- 1 continuously open call for recruiting 250+ External standardisation Experts (EPE)
- 250+ Automated services delivered
- 250+ Proactive services delivered
- 5 open calls, assigning 500 Premium services
- 6 training packages, 1,500+ trainees

Community

• 2,000+ engaged community members

3,000+ DB of H2020/HE projects with

promising standardisation paths

- 250+ EPE members
- 10 EAG members

Outreach

- 14 Webinars
- 3 Workshops
- 2 Yearly "Impact Events"
- 24 newsletters
- 8 Press Releases
- 36 Professional Videos Visibility at 10+ third party events

HSbooster.eu reports and policy briefs can contribute to the EU Standardisation ecosystem providing live information on the activities, status and impact of projects in the standardisation field.

29/07/2022

Facilitating R&I innovation related stakeholders in EU projects towards EU standardisation and ensuring two-way flow of information that can contribute to identification of new areas for standardisation.

HSbooster.eu Horizon Standardisation Booster

5 OPEN CALLS

Covering topics related to the standardisation urgencies highlighted in the **EU Strategy on Standardisation**.

The 1st OPEN CALL will start on 21st June until 30th September

2nd OPEN CALL > October 2022 - January 2023 3rd OPEN CALL > February - May 2023 4th OPEN CALL > June - September 2023 5th OPEN CALL > October 2023 - January 2024

Open to all Horizon Europe and H2020 ongoing or finished projects | More info: www.hsbooster.eu/open-calls-eu-projects

First OPEN Call for EU Funded Projects

Deadline to submit applications > 30th September 2022

Sustainable Digitalisation

Data quality & Artificial Intelligence
 Access to & usage of data
 Space
 Data and cybersecurity
 Quantum technology

EU Green Transition

Clean energy

Materials (raw and secondary)
Green & sustainable production
Environmental impact

Resilience

Robust supply chains
Climate resilience
Hybrid civil/defence
Data protection & cybersecurity

Smart City & Circular Economy

- Circular economy
- Transportation
- Infrastructure
- Green buildings

Topics based on EU Standardisation urgencies, EC call topics & focus of ESOs, NSBs, SDOs. <u>https://hsbooster.eu/open-call-topics</u>

OPENCALD for Standardisation Experts

Supporting Horizon Europe and H2020 projects address Standardisation priorities in Europe

Join our pool of experts

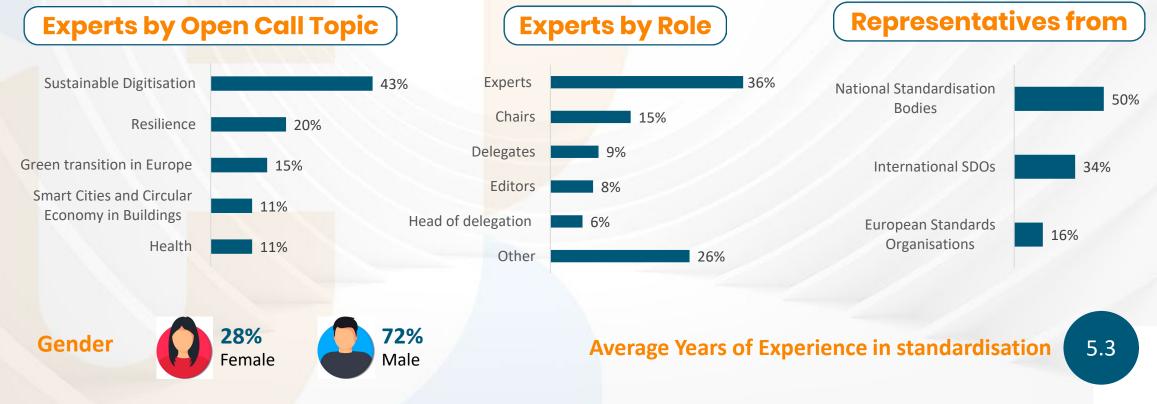

Funded by the European Union

Standardisation Expert Open Call

57 Standardisation Experts Recruited since 30th May 2022

Open call open until January 2024.

Standardisation practices & procedures | State of the art | Where are revisions or new standards needed? | Optimal standardisation workflows and timelines | Unique inside knowledge to facilitate contributions Applications open: www.hsbooster.eu/epe/register

Next steps

- **First Open Calls fo**r projects opens 21st June 2022
- July August
 - Finalisation of service platform & testing
 - Allocation and notification of experts to project applications

75th September

- Service delivery commences
- September 2022 March 2024
 - Services delivered on first come first serve basis

Thank you

#7 Open Call

Looking for funds to support your work on **ICT standards**?

Submit your proposal to the **7th Open Call**

Open Date: 5th May 2022 Closure: 6th July 2022

APPLY NOW!

"Artificial intelligence is a global "game changer". It will transform our lives and our societies. It is sometimes said that the best way to meet the future is to create it. Let us not leave that to others." [Morten Irgens, Vice-Rector, Oslo Metropolitan University, Norway]

The #7 OC will run until the 06th of July. The leading theme will be "AI, Data & Robotics" and the list of eligible topics has been augmented with the introduction of new topics of the recently released ICT Rolling Plan and more (i.e. Data Economy, 6G, U-Space) https://www.standict.eu/stan

Standards in ADRA-e

European Partnership on Artificial Intelligence, Data and Robotics

Ray Walshe

ADRA-e

Call: HORIZON-CL4-2021-HUMAN-01 (A HUMAN-CENTRED AND ETHICAL DEVELOPMENT OF DIGITAL AND INDUSTRIAL TECHNOLOGIES 2021) Topic: HORIZON-CL4-2021-HUMAN-01-02 Type of Action: HORIZON-CSA Proposal acronym: Adra-e Type of Model Grant Agreement: HORIZON Action Grant Budget-Based Budget: €4,000,000

Standardisation methods for trustworthy and ethical Al to foster AI, data and robotics industry, and in support of the Commission regulatory framework.

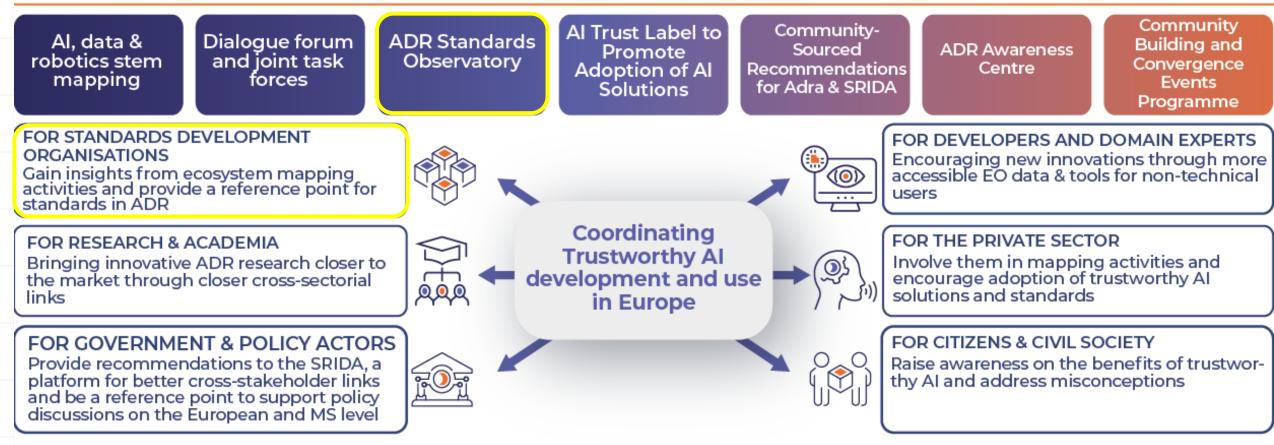

- The project will develop the ADR online Observatory of standards and standardisation activities, leveraging on the StandICT.eu project. After the first iteration, which will cover the standards at European level, further iterations will pave the way at international level for the sustainability of the activities in Adra-e. [Technological impact, T5.2 through the building of a feasible European regulation framework.]
- In a wider impact, the adoption of standards will improve the trustworthiness of EU industries and processes and increase their acceptance by the civil society. Driven by ethical principles, standards and efficient regulations will safeguard the interests of EU citizens.

Scale and significance of the project's contributions to the expected outcomes and impacts

- 50 standards Having the experts group supporting the technical WG on ADR will impact on average 50 documents own to the multiplier effect typical of the TWG & TCs technical committees. To maximize the impact on Europe needs, a focus on harmonized standards needs will be made.
- Scale: 30% of new standards analysed. An effect of this type immediately contributes to bringing the European standardisation community at a remarkable level of impact on international standardisation.
- Significance: Europe will have a corpus of standards harmonized with its regulation and Europe's voice towards standard development activities will be reinforced when Adra takes over at the end of Adra-e.

Adra-e's Value Proposition to Target Groups

Value proposition to ADRe target groups

ADRA-e Standardisation and regulation

OBJECTIVES

- Provide support and contributions for the implementation and the update of the SRIDA standardisation actions for trustworthy and ethical AI to bolster the AI, Data and Robotics market in Europe.
- Set up a competent and authoritative Experts Group for standards.
- Deliver a comprehensive, relevant, and inclusive AI, Data & Robotics Standards Observatory
- Task 1 Expert Group animation, state-of-the-art in AI, Data and Robotics standards, and monitoring of ongoing standardisation activities.
- Task 2 Alignment and mapping with regulations and research recommendations.
