Data Access Component

Héctor Iturria Sánchez

GLOBAL VISION:
IoT TODAY AND BEYOND

IOTForum

Data Access Component

A platform about Data...but

Data already exists

Countless technologies for persistence or transmission

Unknown data structures

Data Access Component

The Data Access Component is the responsible of

Get data from different independent sources

Make them understandable for all the other platform users

Make them available for all the other platform users

Data Access Component

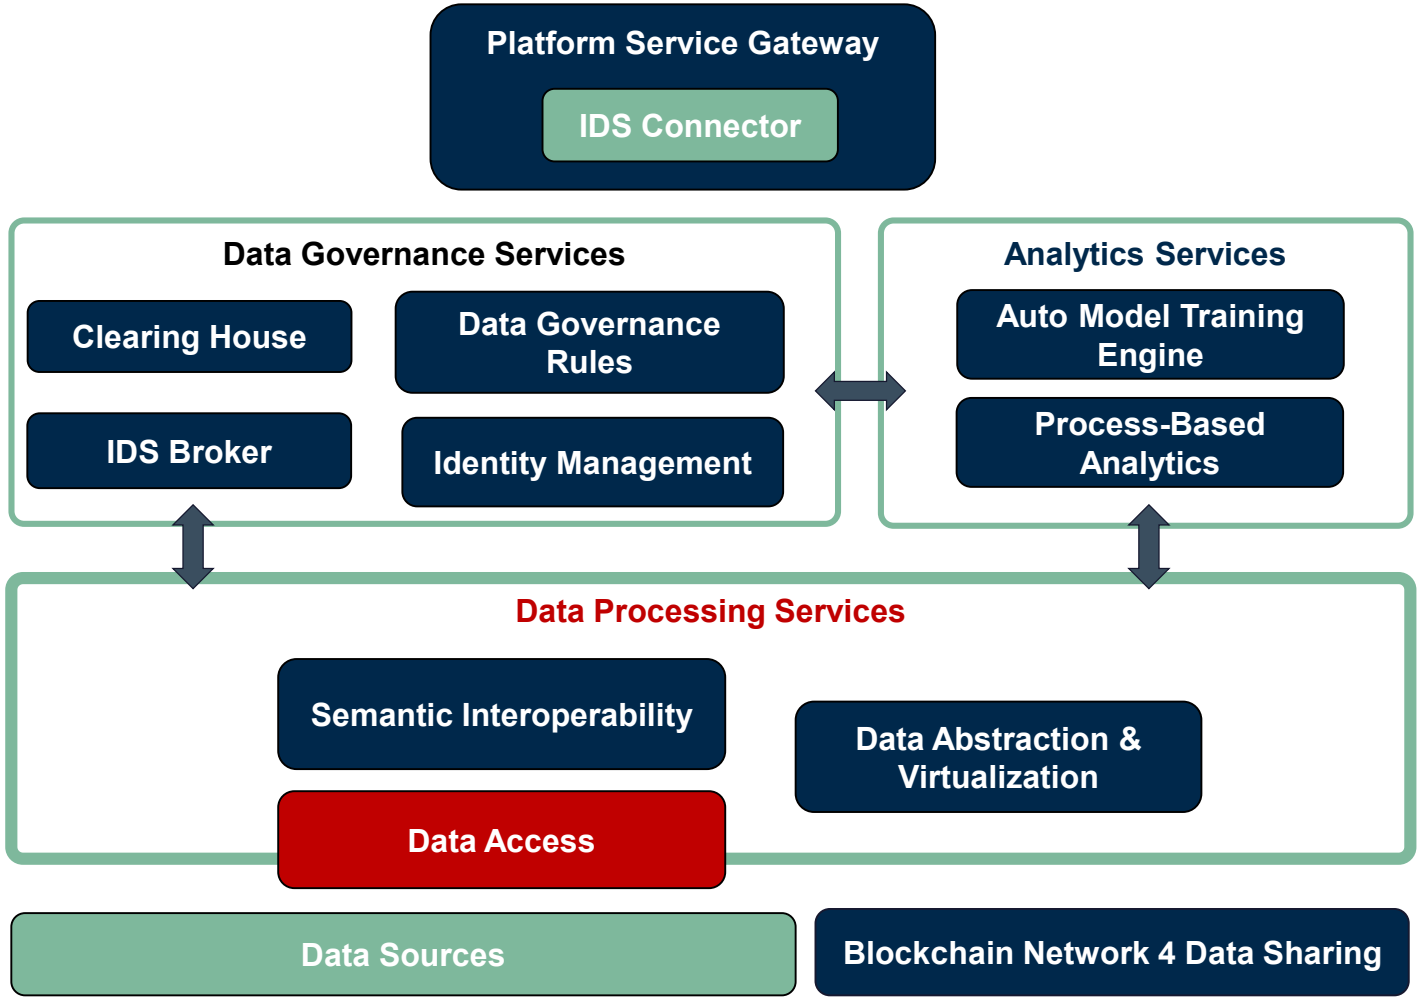
When should I use the component?

+ Do I have data of interest for other stakeholders?

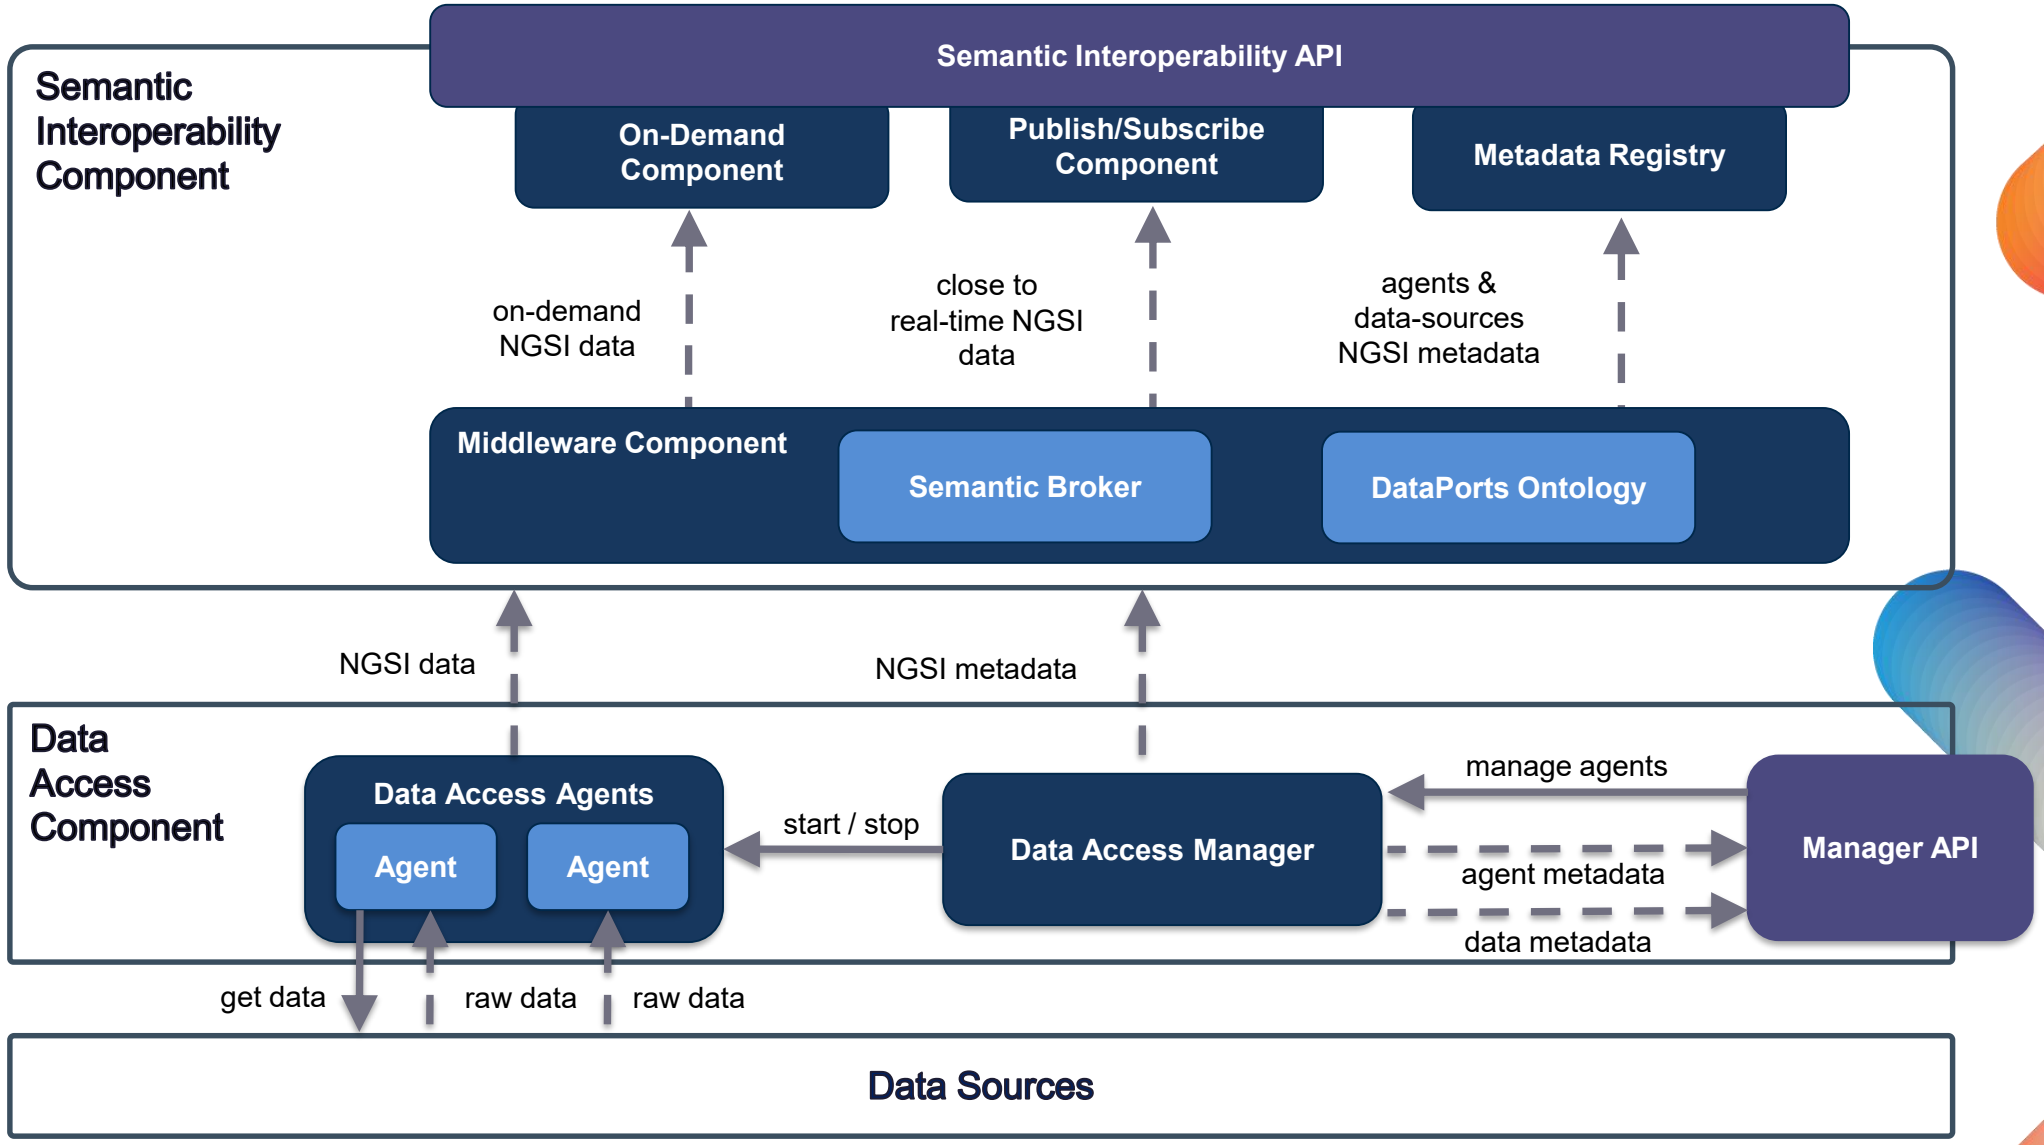
+ Would I love to have a way to integrate my own different services?

− Do I just want to get data from third parties?

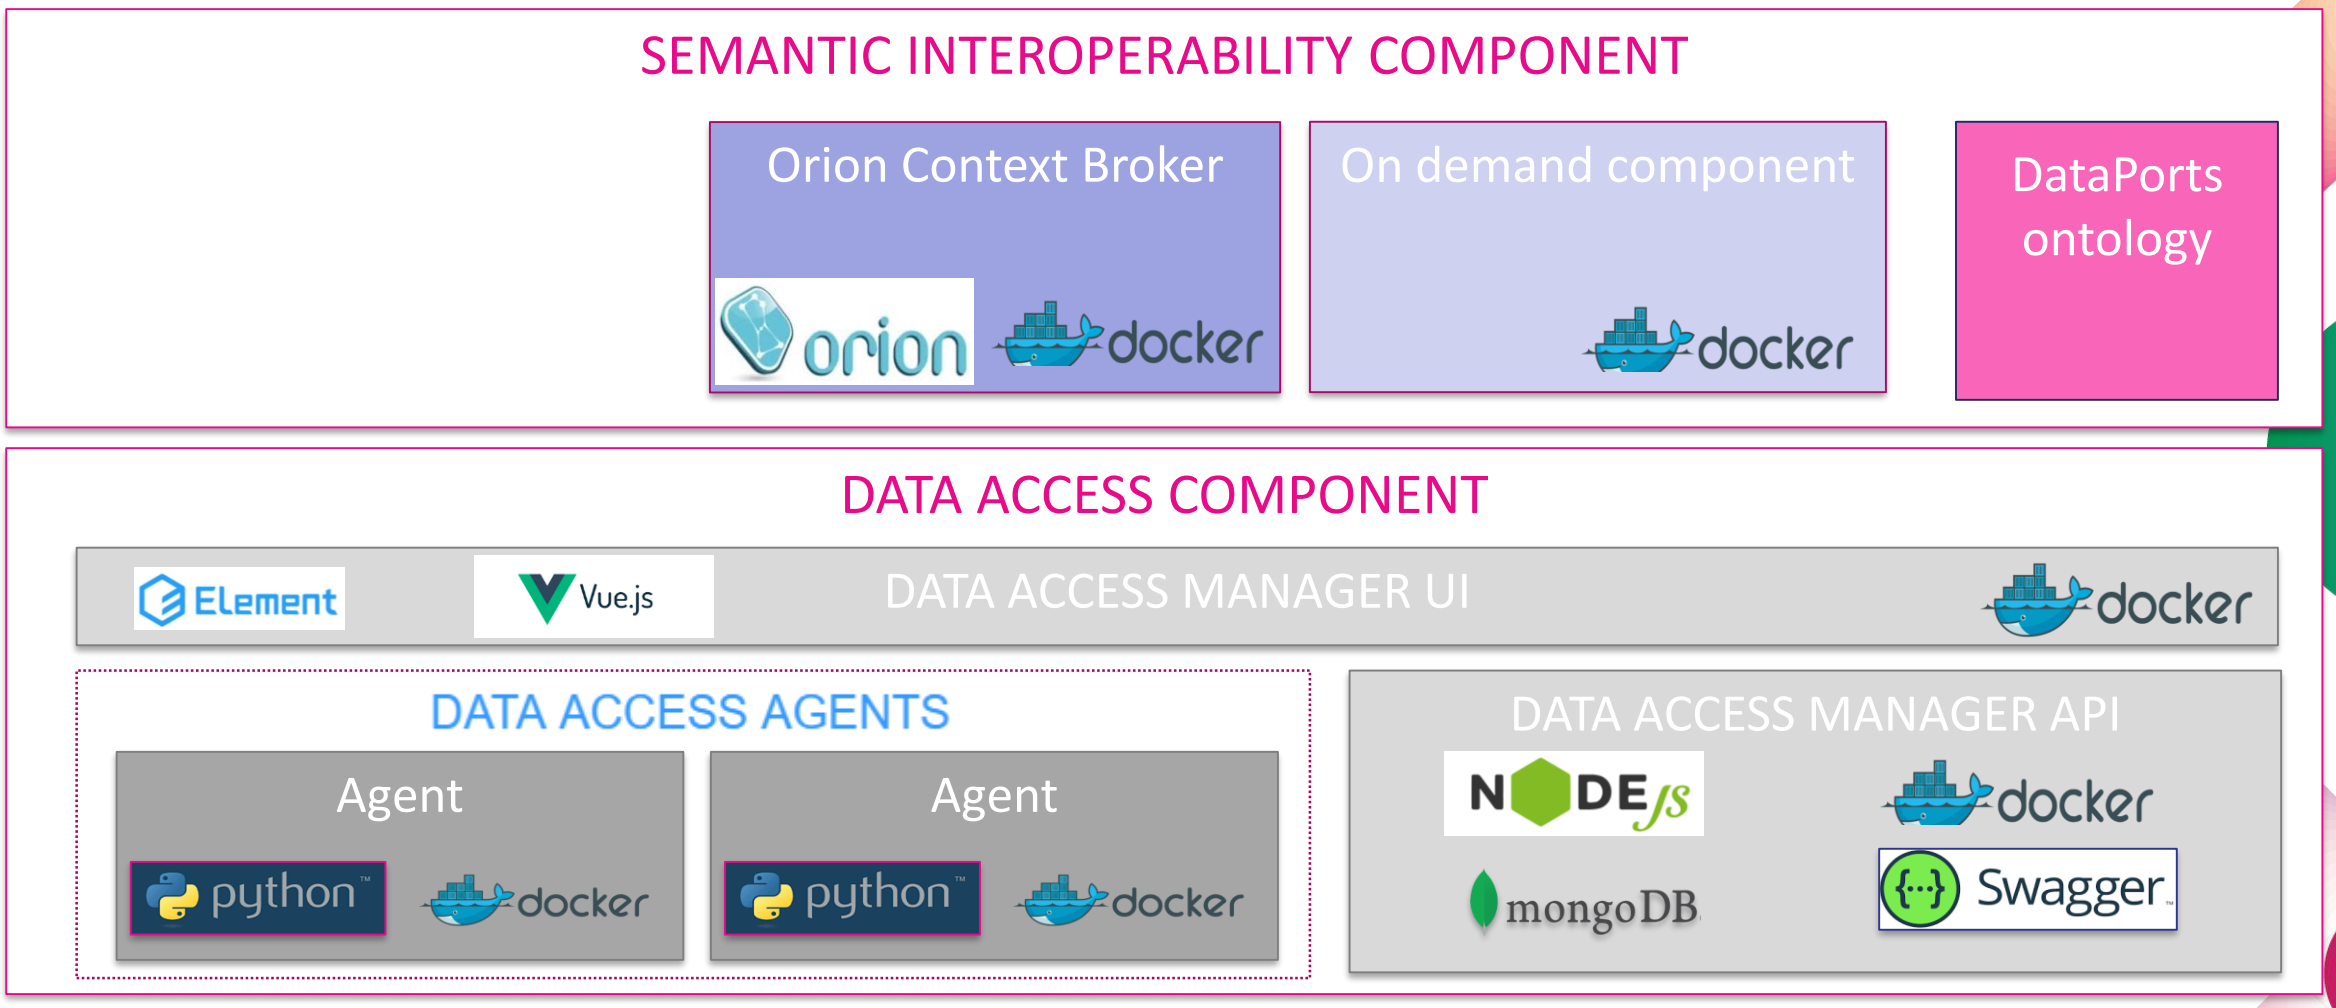
Position in the platform



Position in the platform



Technologies



pyngsi: framework that helps you write a pipeline for a Fiware dataflow.

Integrations
