# Factories of the Future 2020 Roadmap in Action: Projects!

## Involvement? Inspiration? Benchmark?

# The Factories of the Future PPP

## Critical Mass

	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	Nr of projects	Cumulative total
FoF-2010		25 projects					post-project impact & investments												25	25
FoF-2011			36 projects				post-project impact & investments												36	61
FoF-2012				37 projects			post-project impact & investments												37	98
FoF-2013					53 projects		post-project impact & investments												53	151
FoF-2014						25 projects	post-project impact & investments												29	180
FoF-2015							25 projects	post-project impact & investments											28	208
FoF-2016								xx projects	post-project impact & investments											
FoF-2017									xx projects	post-project impact & investments										

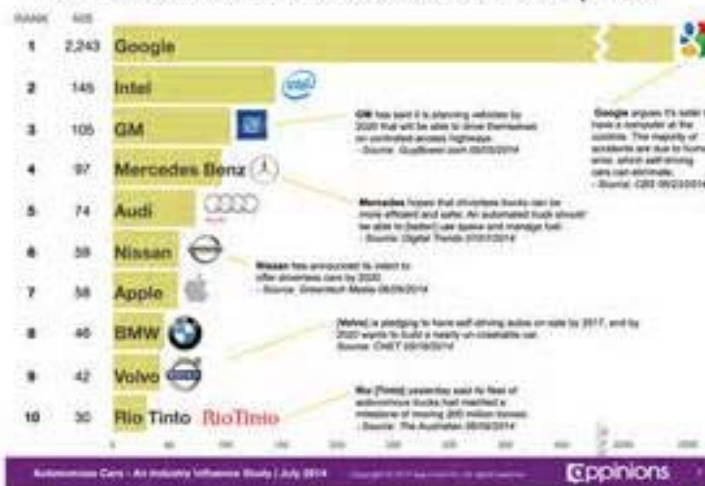

- 208 Projects to date.
- ~ 1,500 organisations participating
- High involvement of SMEs: 200+
- Majority of projects feature demo activities
- 600+ results have been reported on EFFRA Innovation Portal
- Close to the market exploitation of project results
- Project results enhancing existing products and production equipment

# Structural Changes Digitisation

Digitalisation or Digitisation will affect manufacturing in a similar way as it is already happening to communication and consumers markets

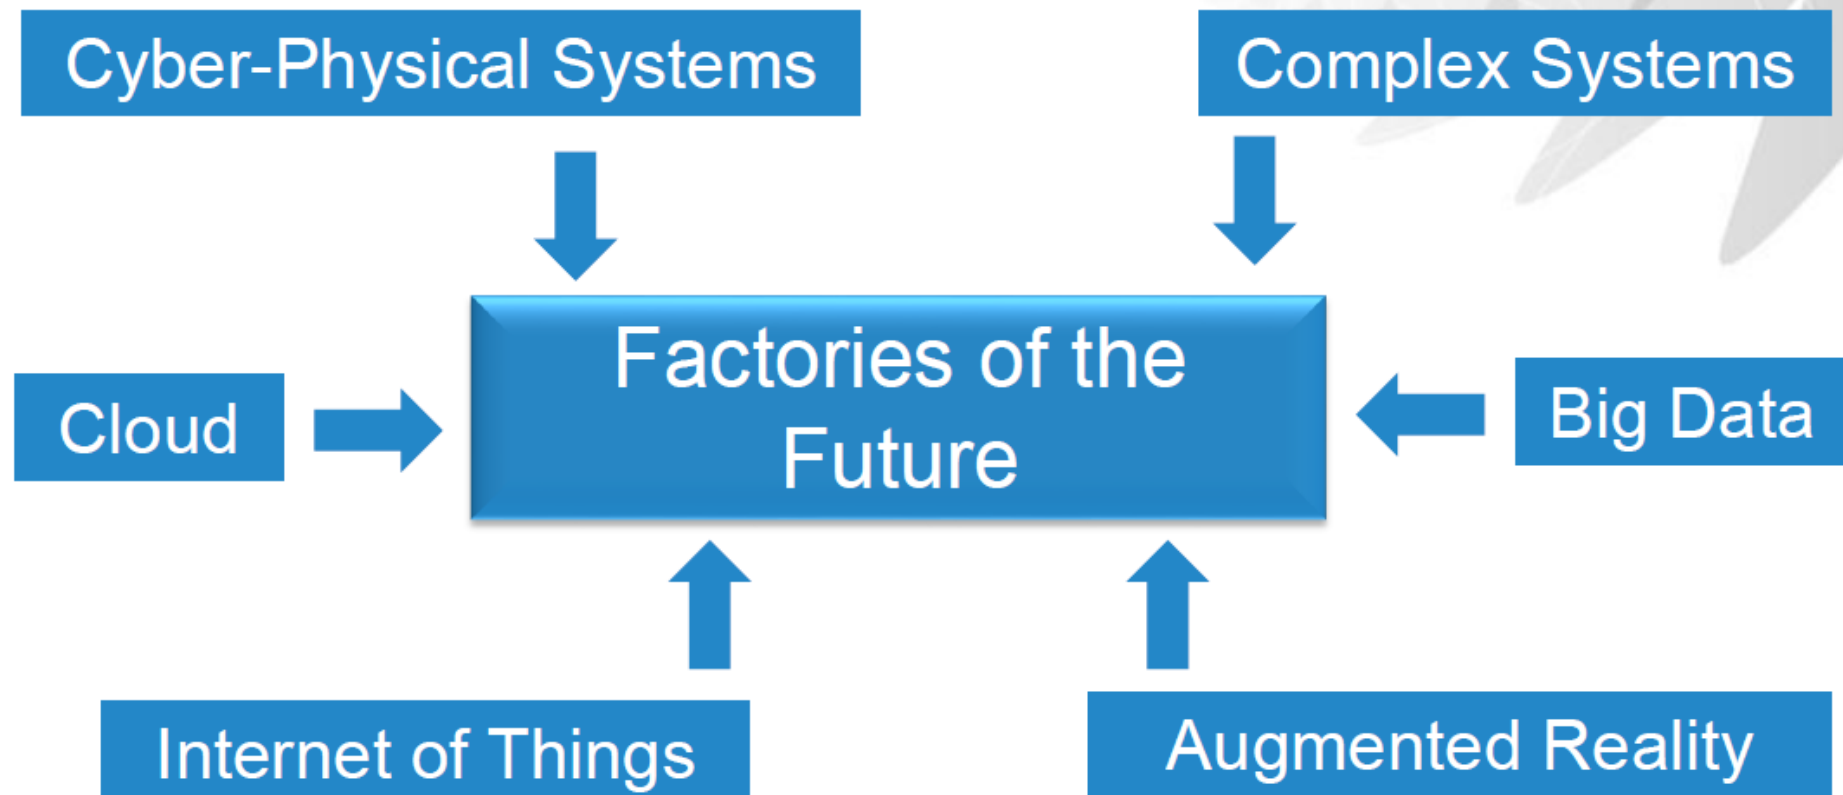

The 10 Most Influential Autonomous Cars Companies

## Factories of the Future

# Digital Issues

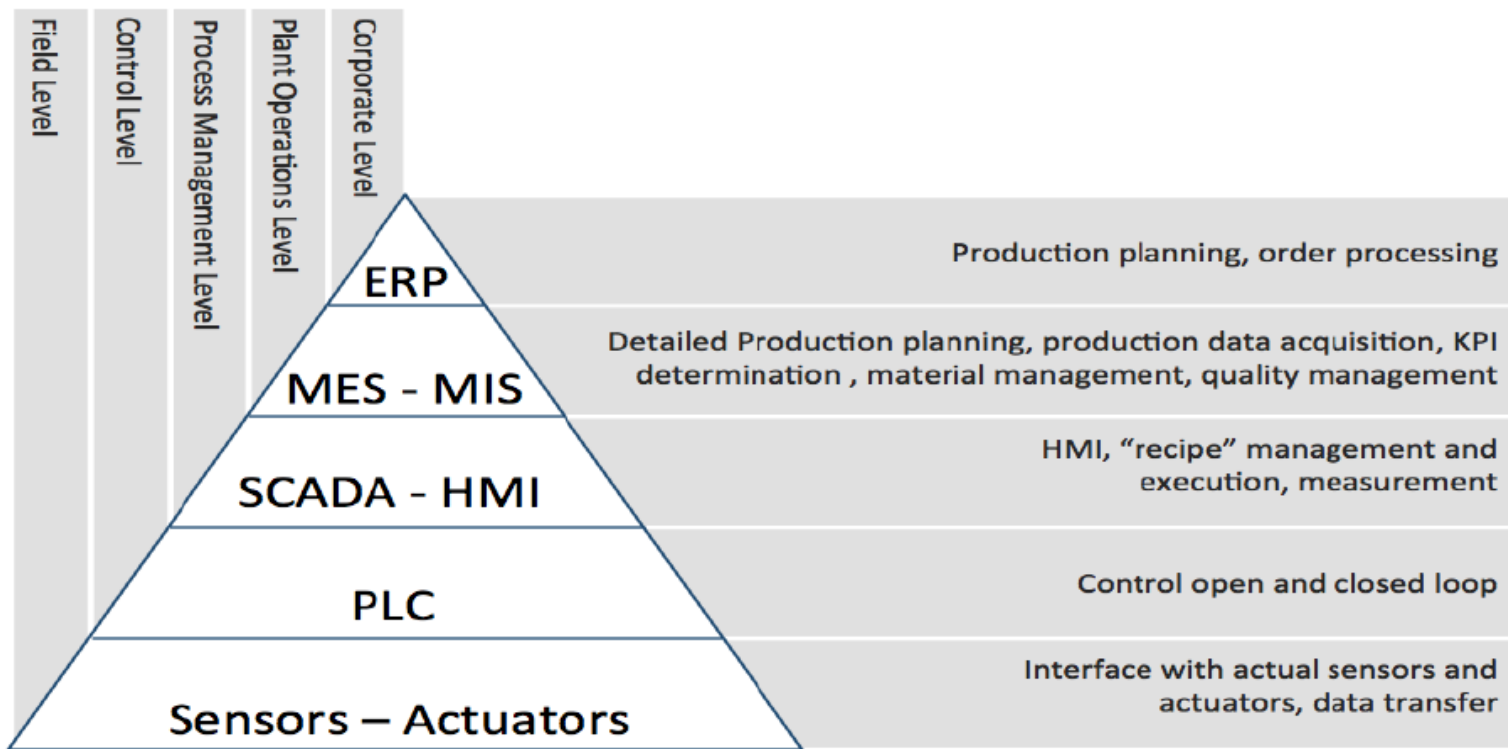

- Selection of digital issues impacting on & being addressed in 'Factories of the Future'

## Factories of the Future

# Change in Industrial Automation

- Current approach to industrial automation

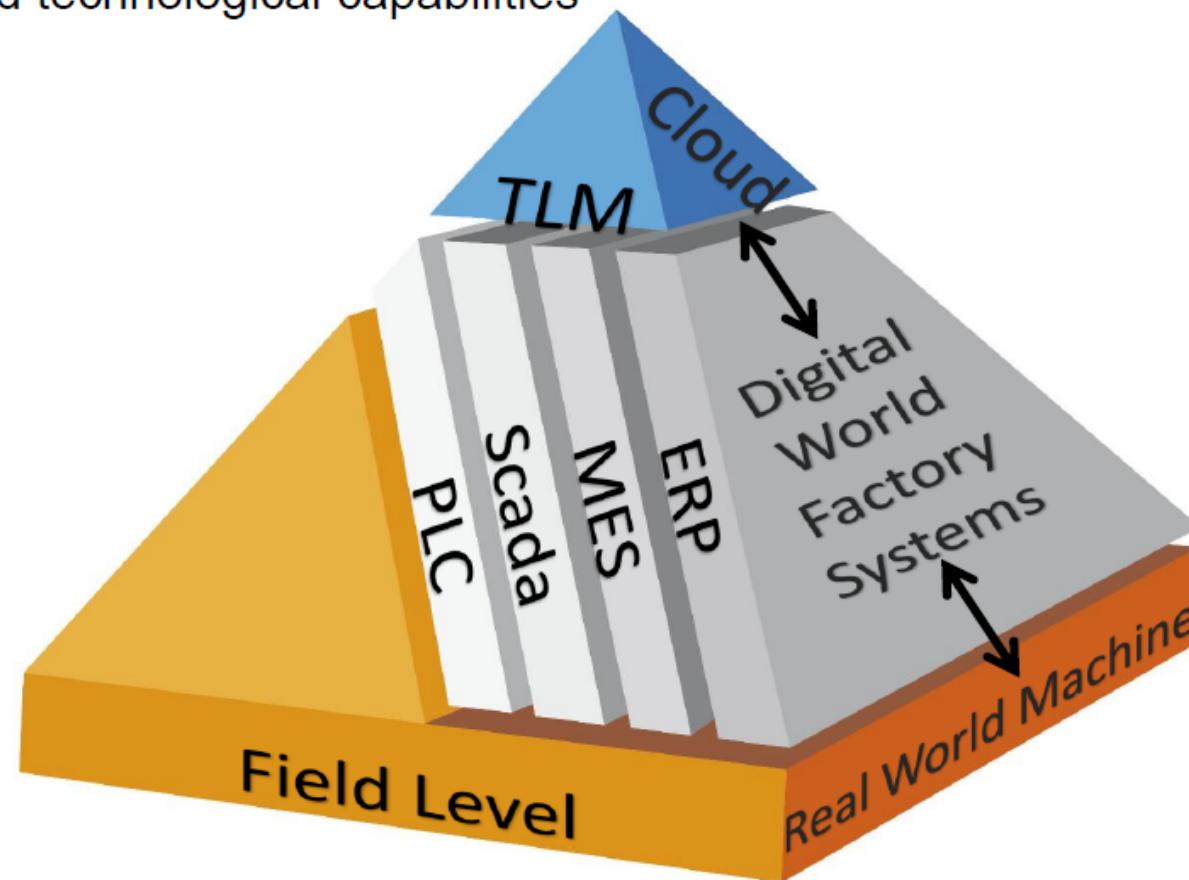

- Viewed as no longer adequate to cope with current manufacturing trends

## Factories of the Future

# Change in Industrial Automation

- Architecture and platforms - BEinCPPS project
- New approach: No longer hierarchical situation but level due to increased technological capabilities

# Factories of the Future Project: CREMA

## H2020 CREMA project

Providing Cloud-based Rapid Elastic  
MAnufacturing based on the XaaS and  
Cloud model

### Providing **Cloud-based Rapid Elastic MAnufacturing** based on the XaaS and Cloud model

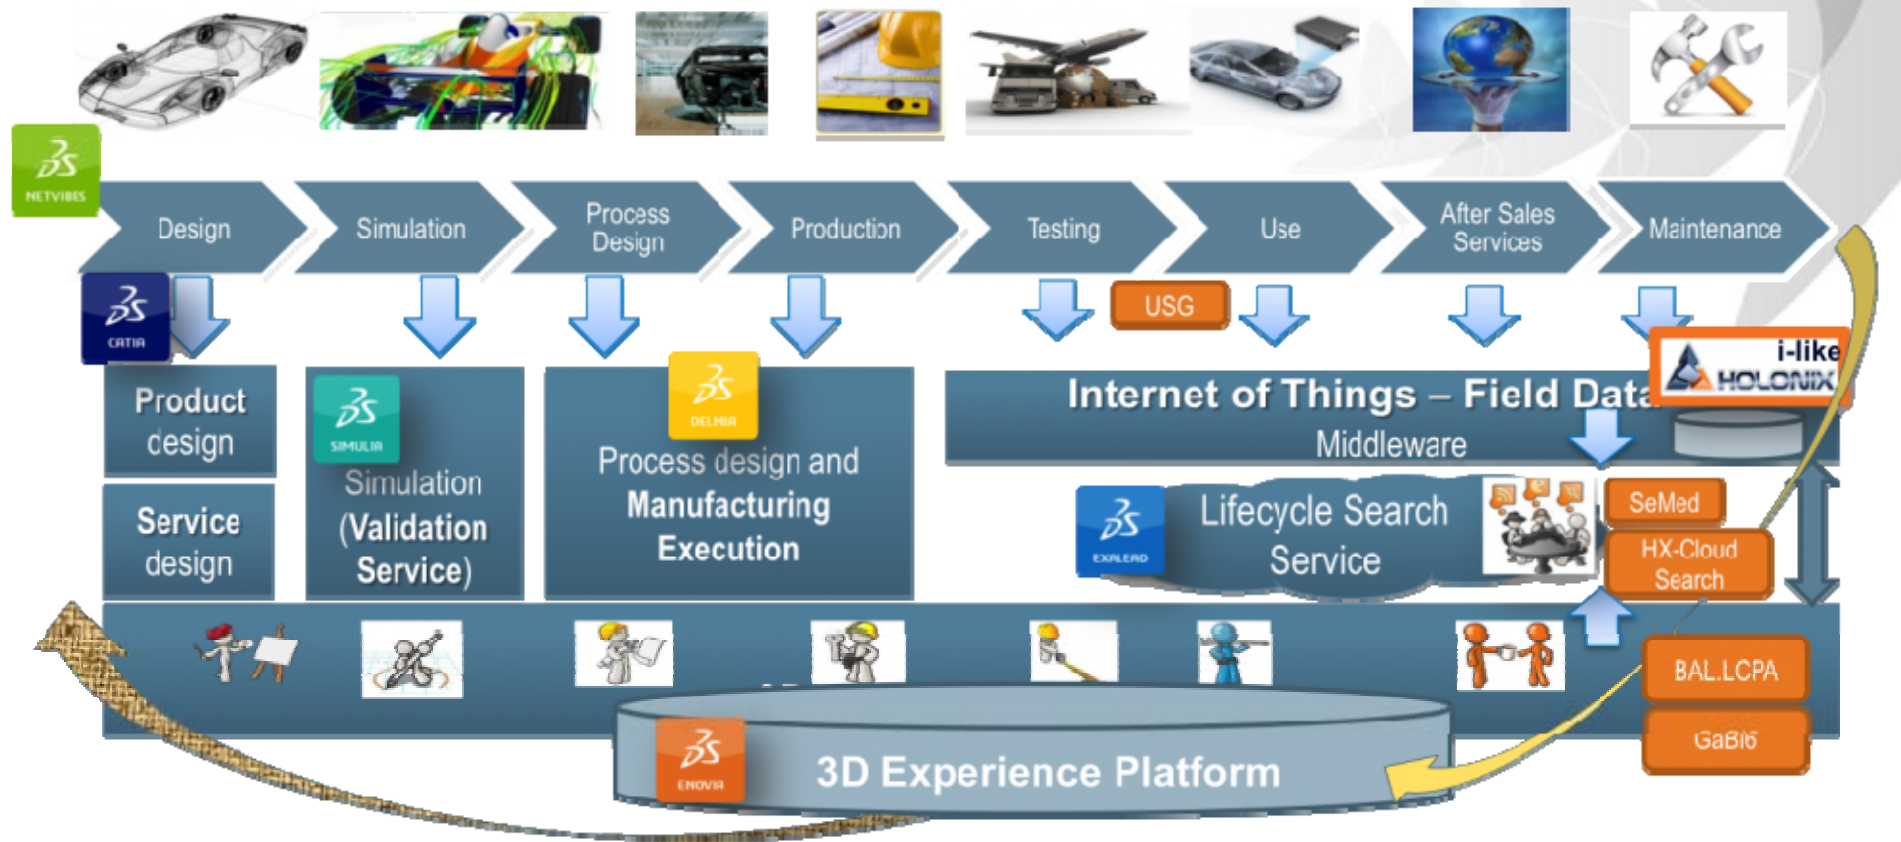

CREMA aims at simplifying the establishment, management, adaptation, and monitoring of dynamic, cross-organisational manufacturing processes following Cloud manufacturing principles. CREMA will develop the means to model, configure, execute, and monitor manufacturing processes, providing end-to-end support for Cloud manufacturing by implementing real systems and testing and demonstrating them in real manufacturing environments.

# Roadmap 2018-19-20

Today

Mid-term review FoF PPP

# Roadmap Timeline

- April 7 2016 – Opening of public consultation on FoF 2018-19-20
- April 2016 – Consultation workshop in co-operation with the sCorPiuS Project
- May 4 2016 – Closing of public consultation on FoF 2018-19-20
- Until end of June – finalise 'Factories 4.0 and beyond' document
- Publish and deliver to EC

## Consultation Document

EFFRA is preparing for its strategic discussion with the European Commission about the 'Factories of the Future' work programme 2018-19-20, covering the three last calls under Horizon 2020. In order to prepare for this discussion EFFRA has launched a public consultation.

We invite the broad manufacturing industrial and research & innovation community to participate in this consultation. Feedback should be provided through the response form that can be accessed once you are logged into the EFFRA Innovation Portal ([www.effra.eu/portal](http://www.effra.eu/portal)). See also [www.effra.eu](http://www.effra.eu).

Please provide us with your feedback by Wednesday, 4 May 2016 after which it will not be possible to provide a response.

EFFRA will use your input to compile a roadmap document complementing the current 'Factories of the Future 2020' roadmap, entitled 'Factories 4.0 and beyond' that will be delivered to the European Commission as a contribution to the preparation of the FoF PPP work programme 18-19-20.

Headlines	Sum of 'Importance'	Close to market
HL01 - Manufacturing for complex and/or multi-material components - rate importance	4460	80
HL02 - Advances in Additive manufacturing - rate importance	4290	77
HL03 - High precision manufacturing - rate importance	3620	74
HL04 - Material and resource efficiency in manufacturing - rate importance	3970	76
HL05 - Energy efficiency on machine level - rate importance	3090	64
HL06 - Energy efficiency on factory level - rate importance	2960	69
HL07 - Zero-defect manufacturing – quality assurance – self-learning systems - rate importance	4620	84
HL08 - Re-use of factories - rate importance	1780	51
HL09 - Safe and ergonomic work environments - rate importance	3360	69
HL10 - Supporting the human in the workplace – Manufacturing training/re-skilling - rate importance	3320	68
HL11 - Human machine/robot cooperation for flexible and evolving factories	3410	71
HL12 - Reconfigurable cells, self-reconfigurable cells through smart sensors/devices	3480	74
HL13 - Distributed Intelligence Architecture and Systems on the Factory Floor	2500	64
HL14 - Novel production management tools for a responsive CPS-based production	2760	69
HL15 - On-site manufacturing technologies	2680	67
HL16 - Digital Factory Modelling and Simulation	3430	75
HL17 - Multiple Source (Big) Data Mining and Real Time Analysis	3360	75
HL18 - Cyber-Physical Factories	2400	63
HL19 - Digitisation of the Supply Chain – Manage complex customer-driven value networks	2490	64
HL20 - Collaborative, dynamic and resilient customer-driven production networks	2020	61
HL21 - New Approaches for the Cyberised Supply Chain	1940	59
HL22 - Manufacturing as a Service (MaaS) – Servitisation of autonomous and reconfigurable production	2250	62,5
HL23 - Collaborative Engineering	2190	63
HL24 - User Centric Product and Production Equipment Engineering	1810	57
HL25 - Standards, Platforms, Protocols and Interoperability	2520	72
HL26 - Security, Privacy and Liability – Cybersecurity and Industrial Safety	2490	71
HL27 - Lifecycle Management/PLM	1940	61
HL28 - European Circular Economy Open Platform	1890	56
HL29 - Business Models for the Digital Service Factory	1690	56
HL30 - New methodologies for financial & risk assessments of innovative production technologies	1410	54

# Factories of the Future PPP: On-line Resource

## EFFRA Innovation Portal

The image displays three screenshots of the EFFRA Innovation Portal. The top-left screenshot shows the 'COMET' project page, which includes a description of the project and a 3D simulation of a robotic arm. The top-right screenshot shows the 'Cloudflow' project page, which includes a description of the project and a 3D simulation of a robotic arm. The bottom screenshot shows the search and filter interface, which includes dropdown menus for 'Sort by' (set to 'acronym'), 'Sort order' (set to 'Descending'), 'Instrument', and 'Programme' (set to 'FoF - Factories of the Future'). A 'Monitoring' dropdown menu is also visible, with options for 'clustering', 'standardisation', 'international', 'spin-offs', and 'patents'. At the bottom, a table lists project details, including 'Project end date', 'website', and 'Duration'.

Project end date	website	Duration
1015-09-30	<a href="http://www.xact-project.eu/">http://www.xact-project.eu/</a>	36
