

Really?

“In this governance model, entire city departments could be converted to DAOs. City staff could serve a curation and advisory role, citizens could hold a decision-making role, and the entire process could be transparent by nature.”

Continuous Innovation in products and services

Security as a service

Privacies: levels of accountability+ rights

Device as #IoT controller

Connected Car/Mobility

Country (NL/Europe) as a service

VWAN

Data entitlement layer – sovereign entities (citizens) in control – passport as device

1

BAN (mental) Health

2

LAN Home

3

WAN Car / Bike

Lean testing – ten year methodology for all gov. agencies

device entitlement layer- pragmatic cybernetics –hardcoded governance (new elite leadership,

Governance / Legal

The horror, the horror

The horror,
the horror

WHOEVER YOU
VOTE FOR THE
GOVERNMENT:
STILL GETS IN

Or?

“In this governance model, entire city departments could be converted to DAOs. City staff could serve a curation and advisory role, citizens could hold a decision-making role, and the entire process could be transparent by nature.”
