

The IoT Solutions Space:

Real-Digital World Data Interoperability in the Product-Service Lifecycle: the PSYMBIOSYS IoT Platform

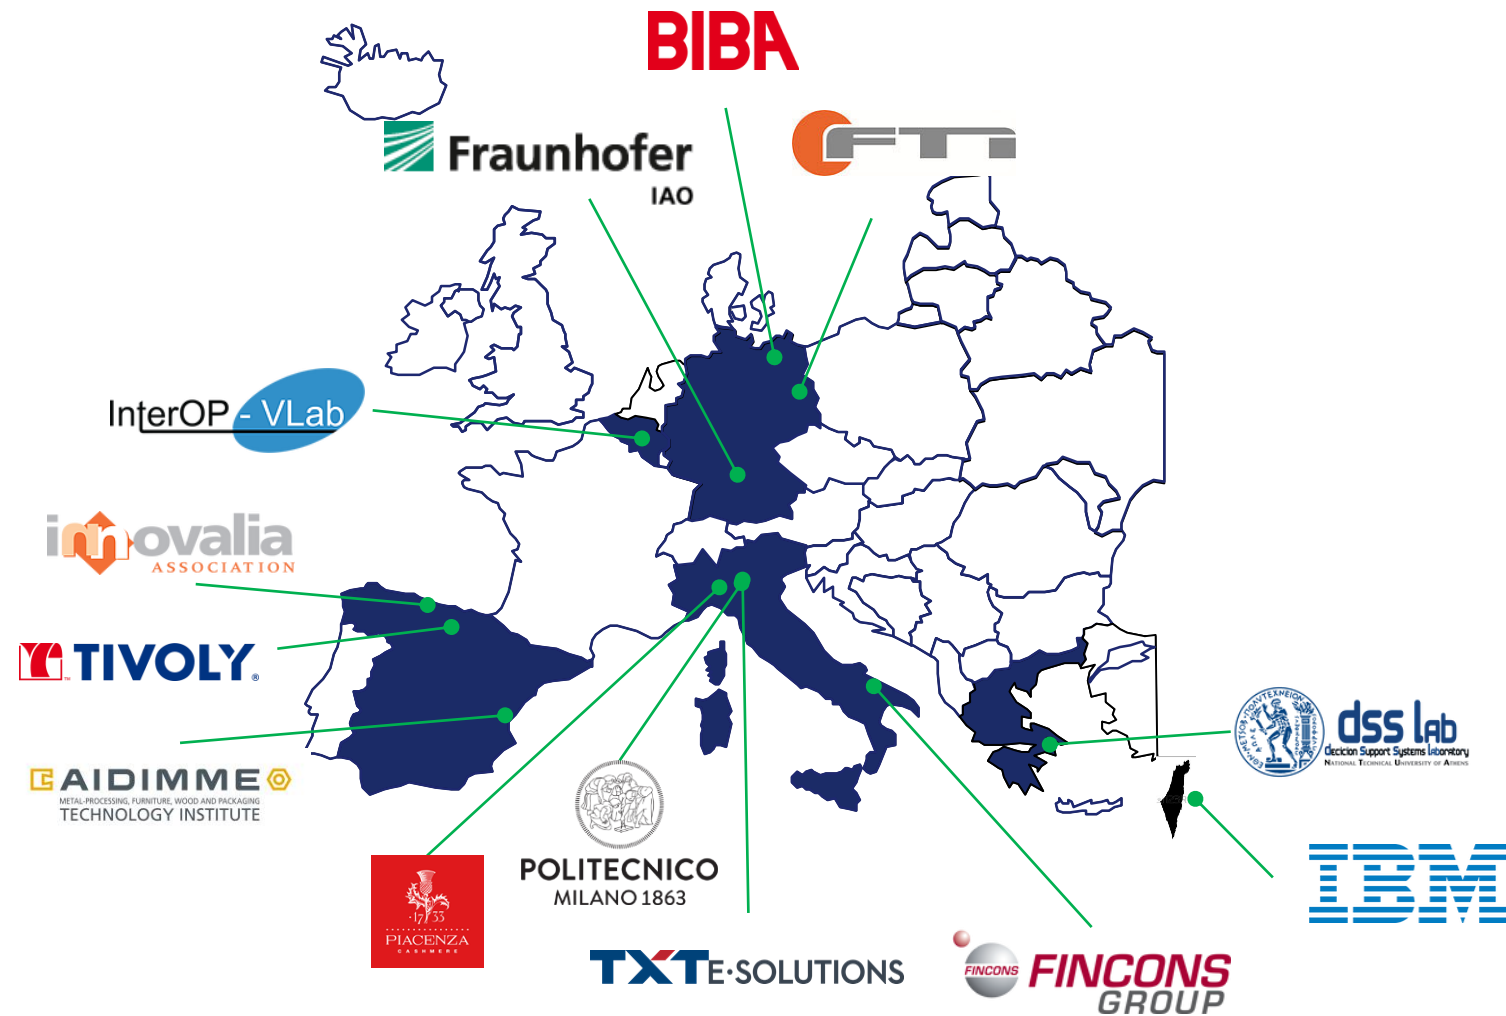

IoT week 2017 - Geneva, June 8th

Uri Shani – IBM Haifa Research

PSYMBIOSYS project

Project No:	636804
Project Full Name:	Product-Service sYMBIOtic SYStems
Duration:	36 months
Start date:	February 1 st , 2015
Partnership:	13 partners, 6 countries
Strategic Objective:	FoF-05-2014: Innovative Product- Service design using manufacturing intelligence
Total Eligible Cost:	5.996.304 EURO
EC Contribution:	5.996.304 EURO

Project consortium

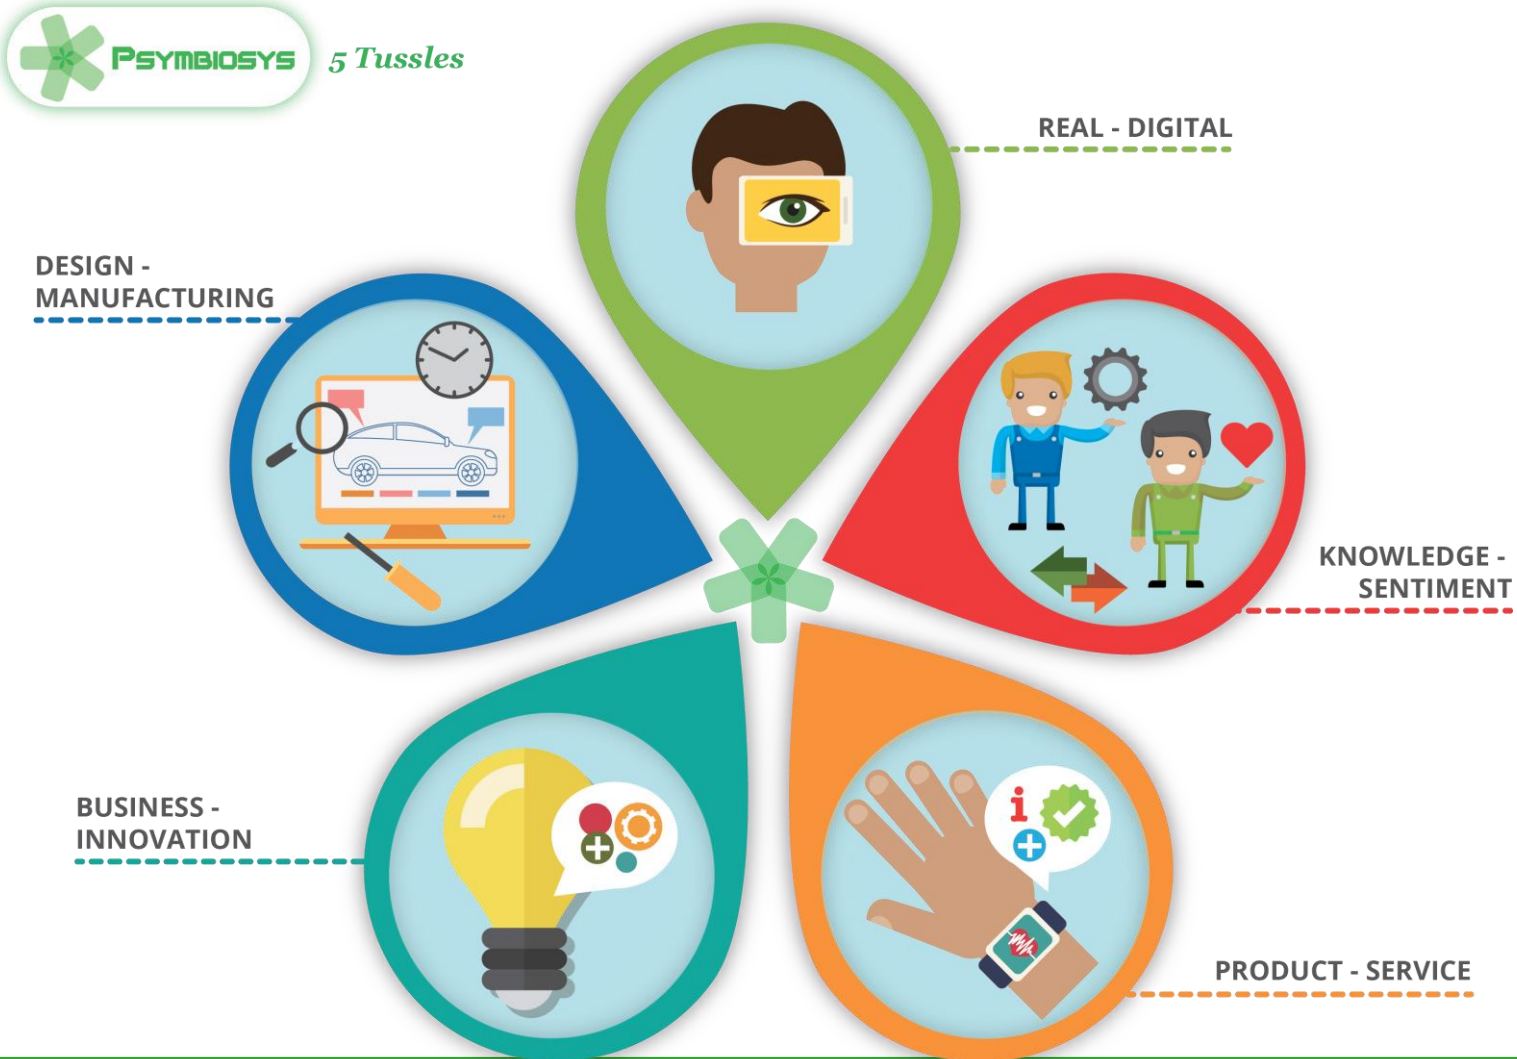

The IBM logo, consisting of the letters "IBM" in a stylized, white, sans-serif font on a dark blue rectangular background.

PSYMBIOSYS 5 Tussles

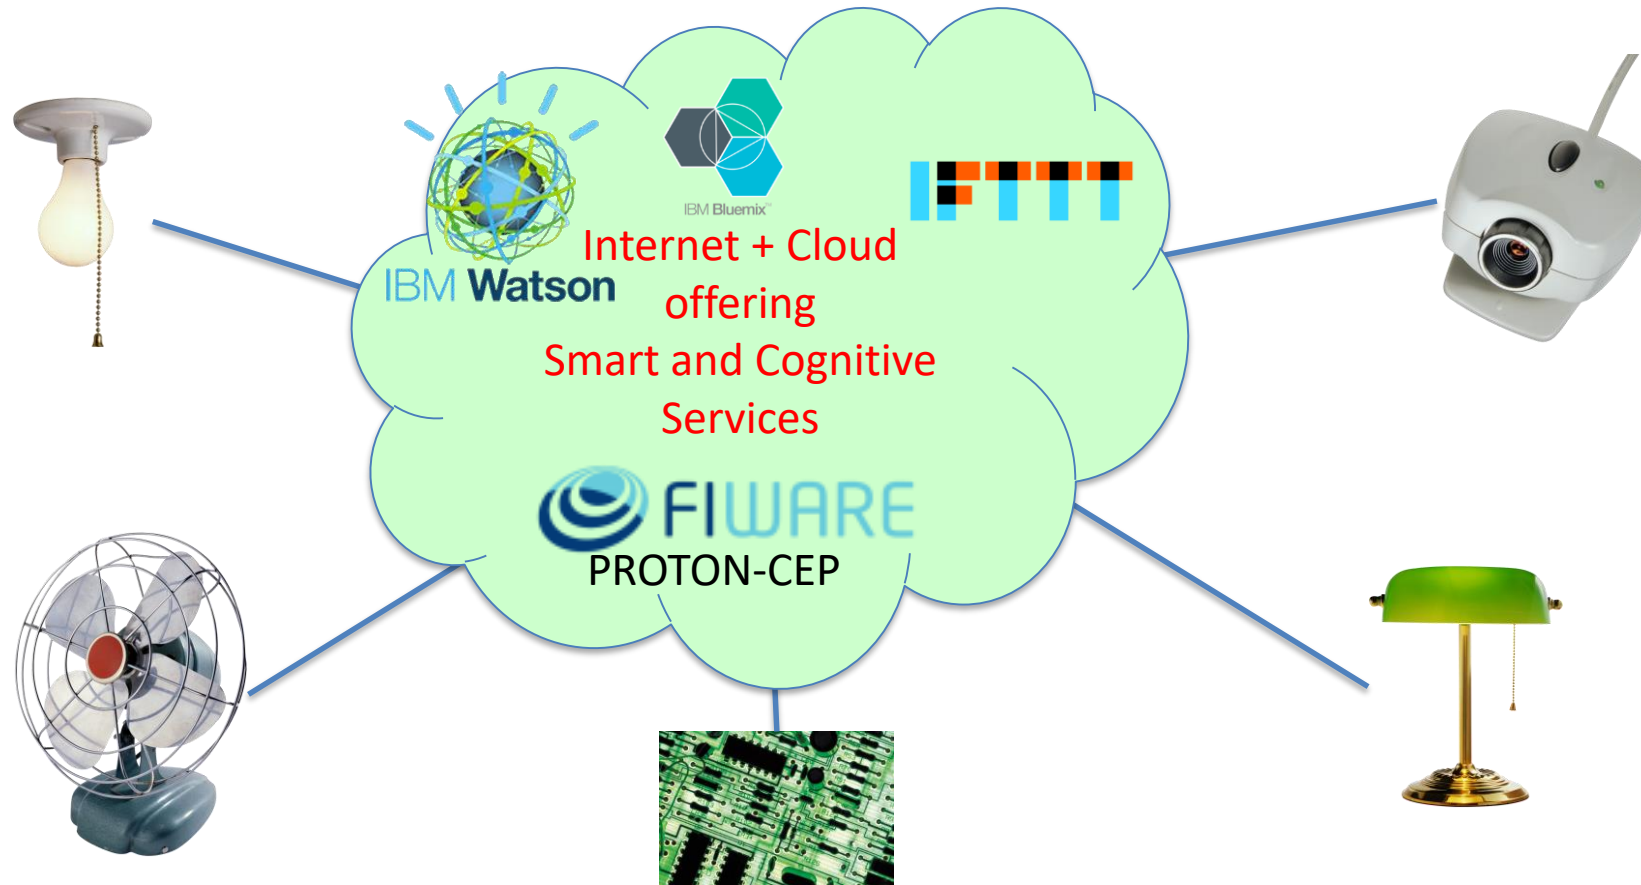

From SCADA to the Internet of Things

From SCADA to the Internet of Things

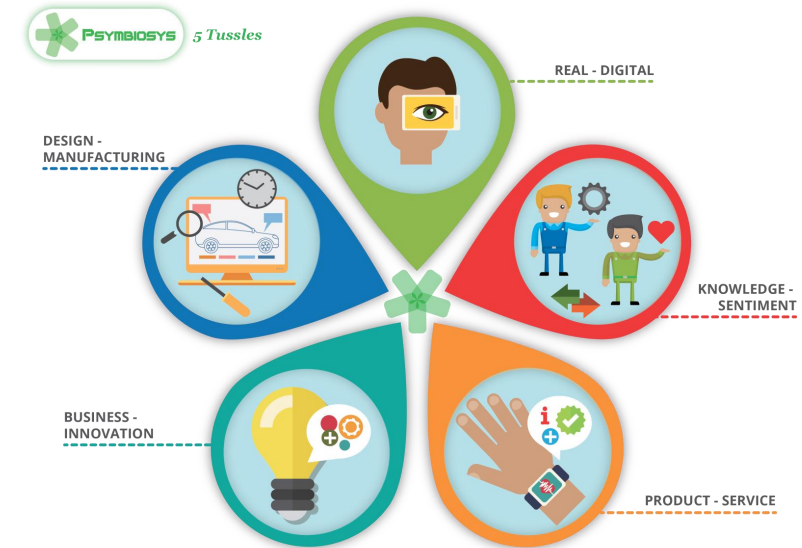

From SCADA to the Internet of Things

IoT in PSYMBIOSYS

- PSYMBIOSYS deals with both PLM and SLM
 - Ideation and innovation
 - Design and Manufacturing
 - Product and Services
 - Real and Digital worlds
 - Tangible and intangible
 - Sentiment analysis

AIDIMME Use Case

- AIDIMME is a Technology company
 - Metal-Mechanical, Wood, Furniture & Packaging
- Furniture use case in cooperation with an office furniture manufacturer.
- Using IoT to mediate RW events into insightful evaluation and loop it back into the innovation and design process.
 - Both RW sensing and customer feedbacks - synchronised

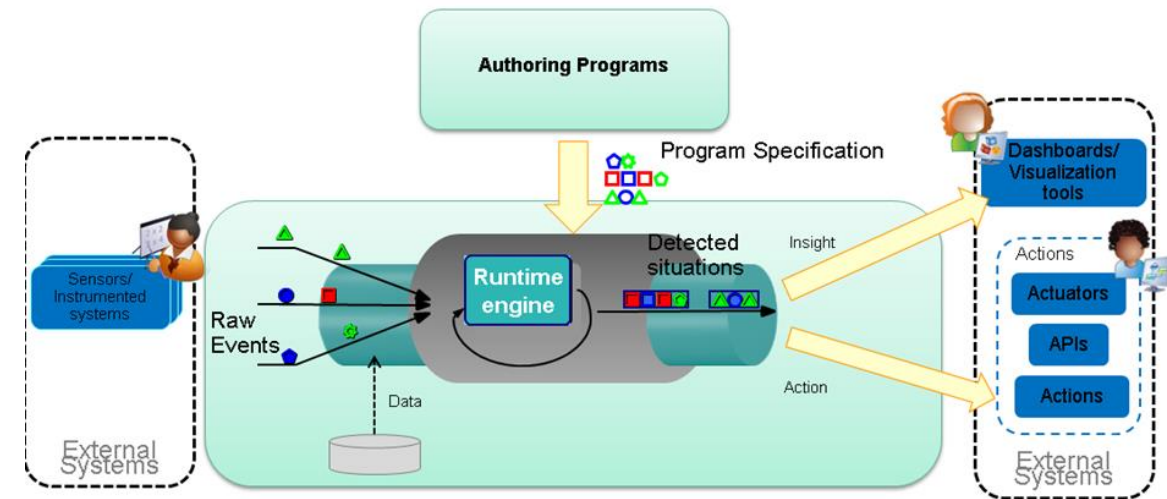

Furniture trial

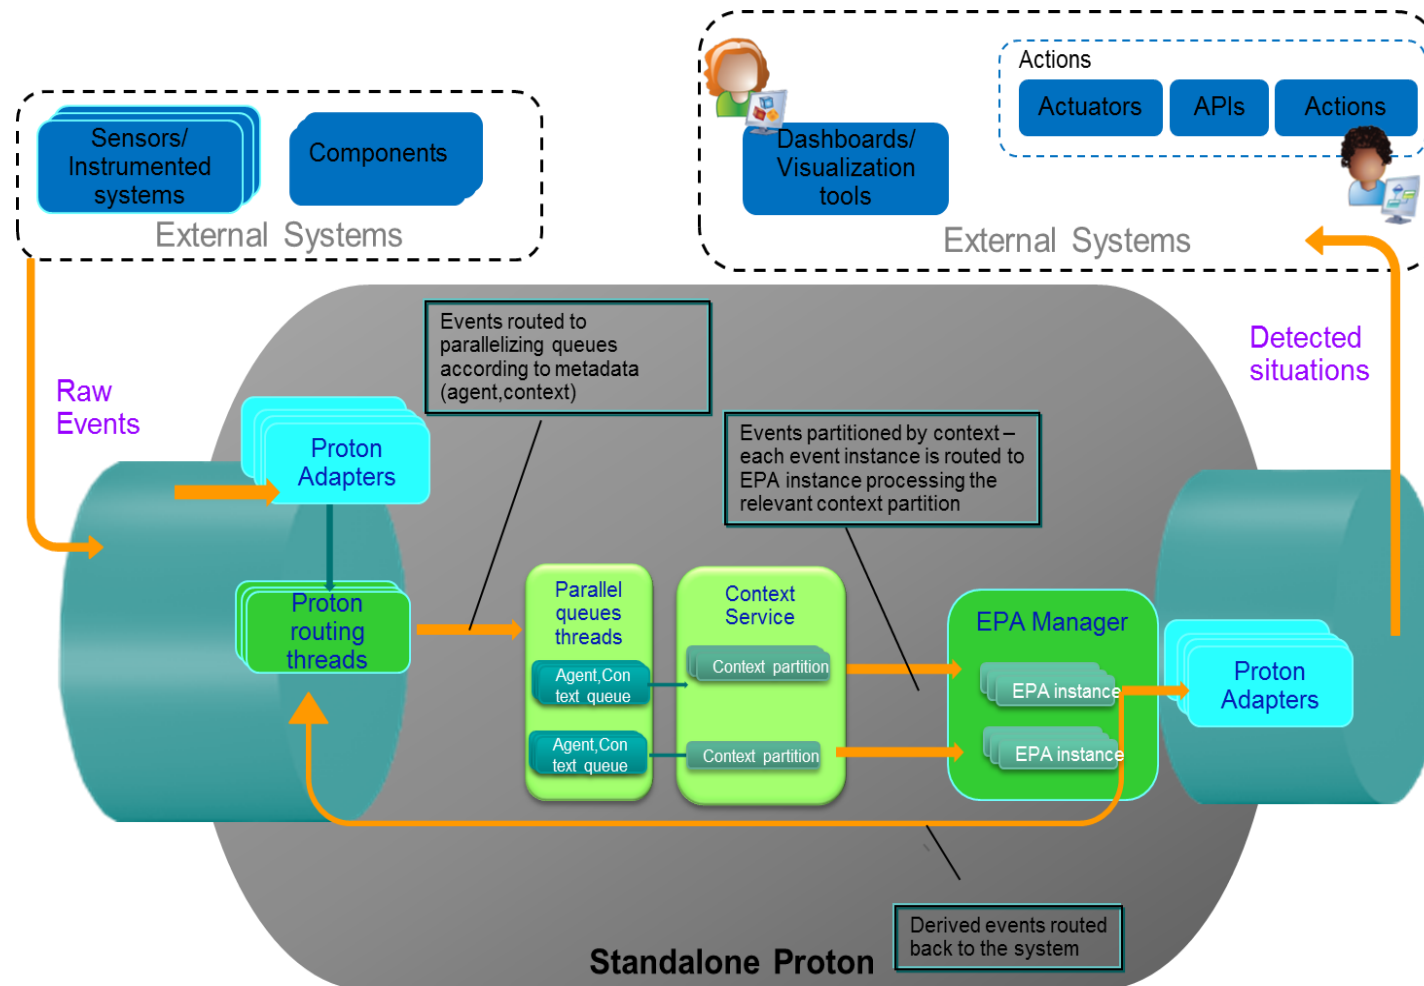

AIDIMME Use Case – RW Events

- Sensors generate events
- Complex Event Processing (CEP) is invoked in real time
- Using the IBM PROactive Technology ONline (PROTON) which is a General Enabler (GE) of the FIWARE foundation.

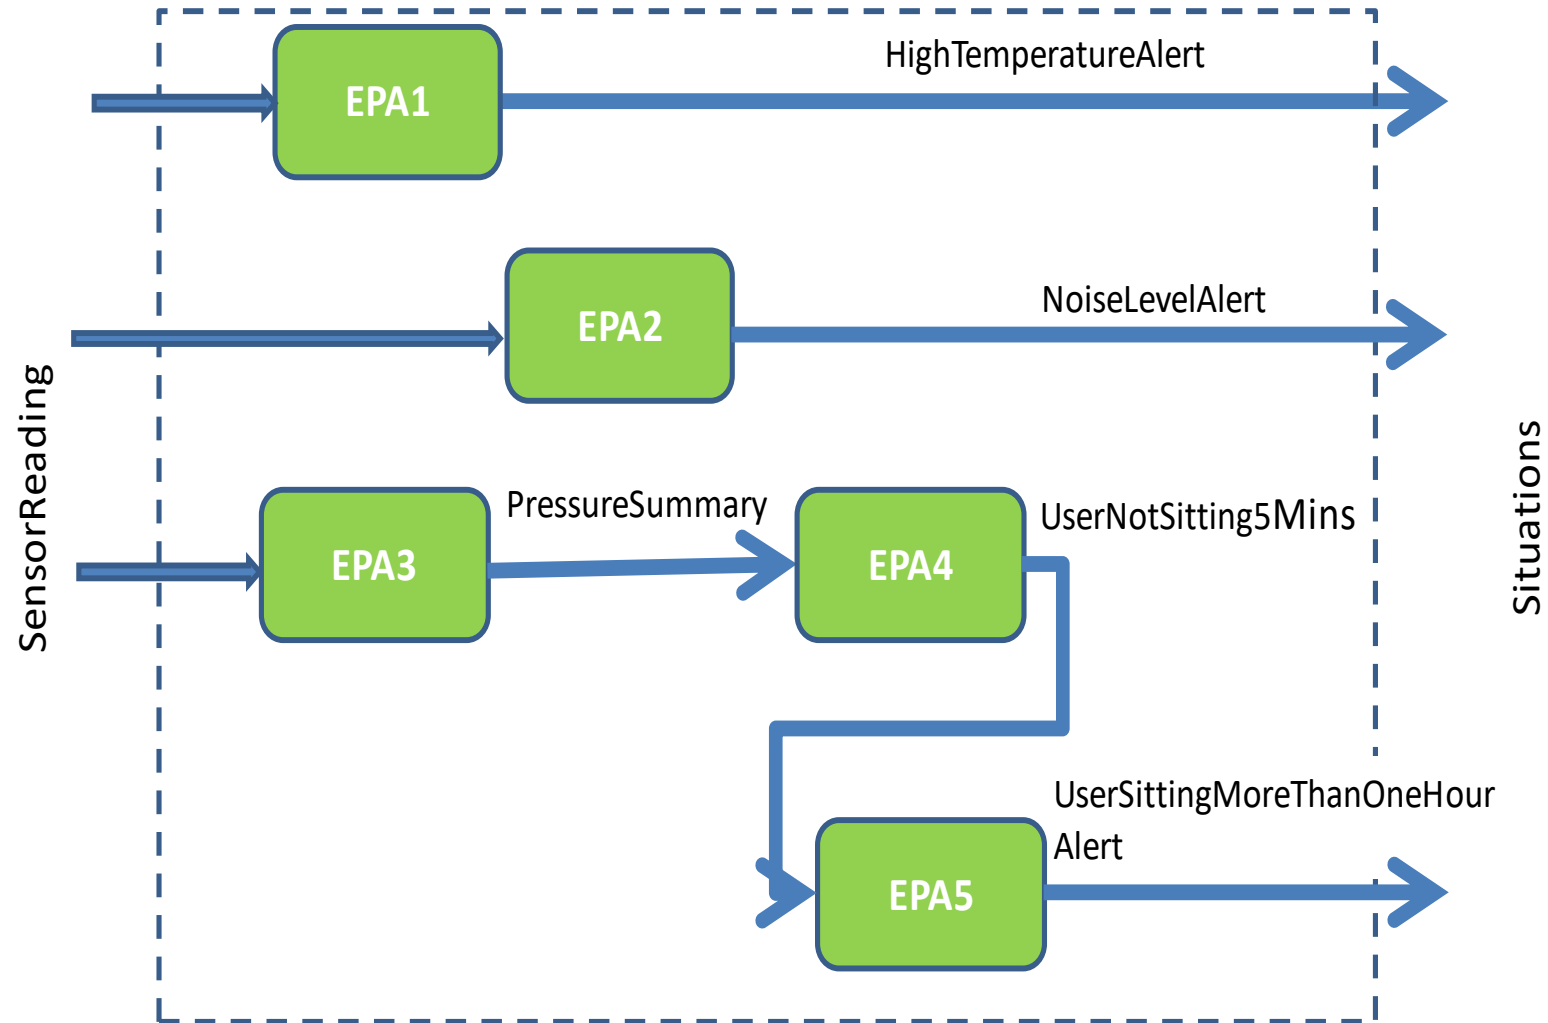

<https://github.com/ishkin/Proton>

PROTON CEP Architecture

AIDIMME PROTON App

PROTON Event Example

```

Massive CEP – PROTON on STORM

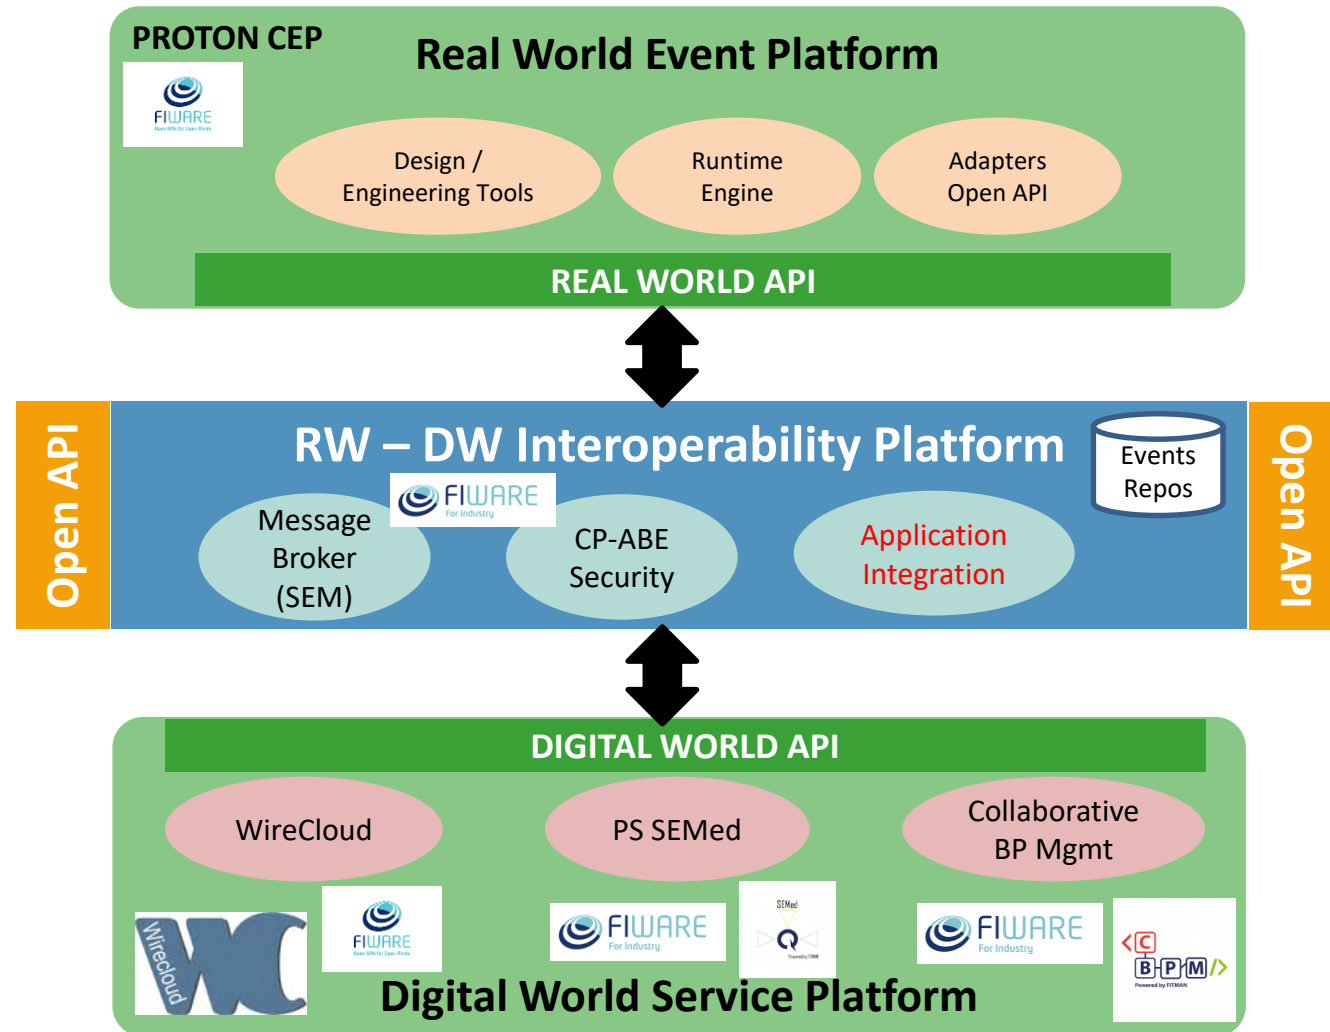

STORM Operational Model and Architecture

Embedding PROTON within the STORM Architecture

PSYMBIOSYS Real-Digital Interoperability

The PIACENZA Example

- Textile company manufacture of high class fabrics
- New designs and materials on annual badid
- Large catalogue
- Expensive interaction with customers
 - When dealing with physical real samples
 - Manufacturing cost of accepted / rejected samples
- TXT[®] Solution: Virtual showroom via simulation
- TXT[®] Solution: Immersive Reality with AR goggles.

The PIACENZA Example

PIACENZA - Textile Pilot

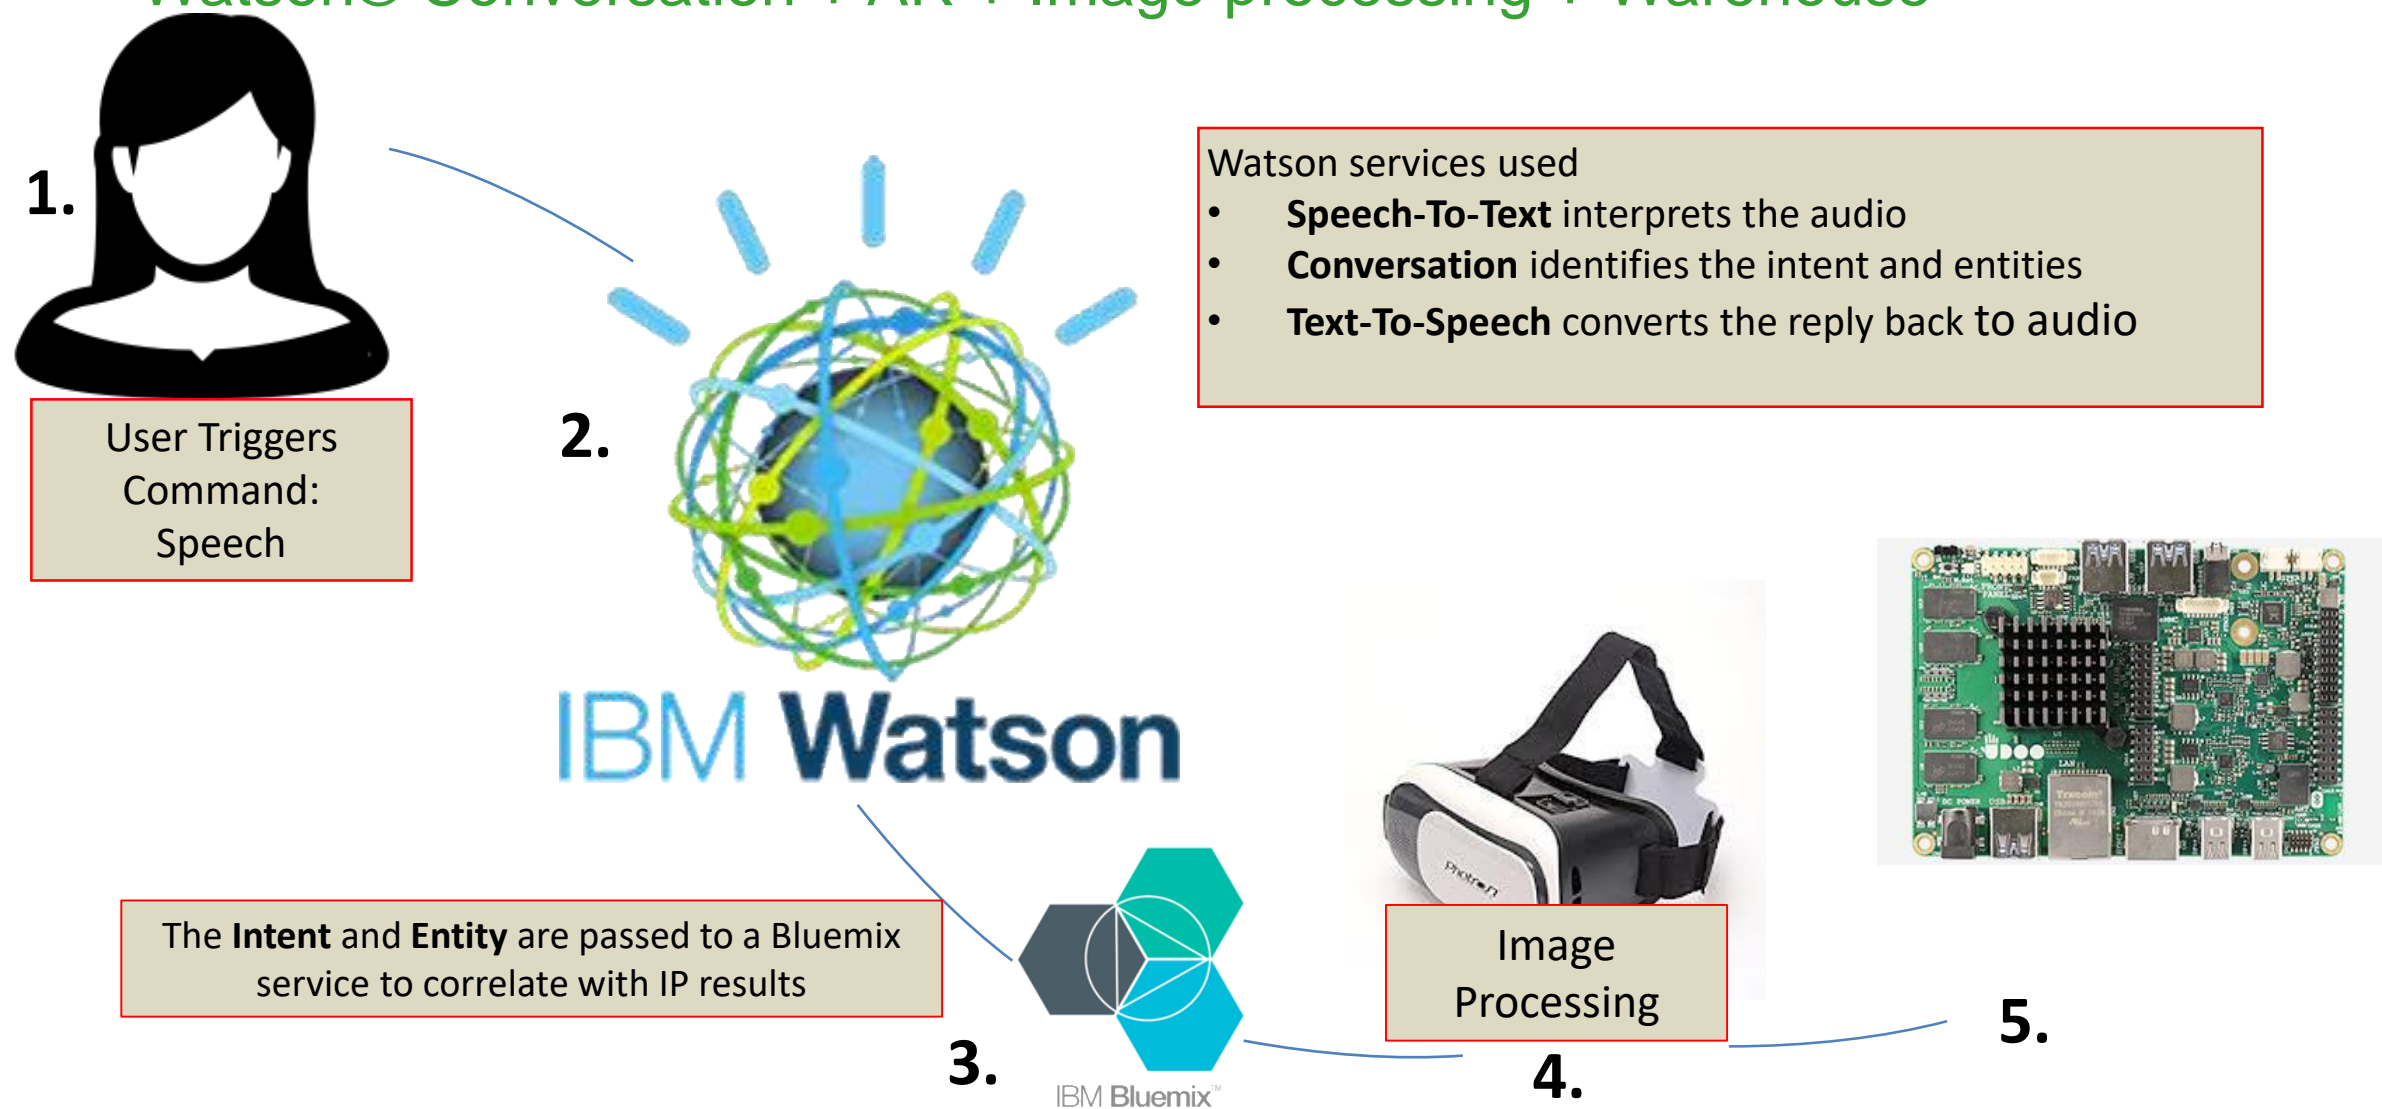

WP10.1 & WP9.3

The logo for TXT E-SOLUTIONS, with "TXT" in blue and "E-SOLUTIONS" in black, preceded by a small green stylized flower icon.

Virtuality, Immersive Reality and Augmented Reality in IoT

- With Augmented Reality – IoT can be extended to Everything
- Imagine you can talk to things
- IBM Research Lab AR for Computer Technician

Watson® Conversation + AR + Image processing + Warehouse

Extending the IoT Reach with IBM Cognitive Computing to Everything Watson® Conversation + AR + Image processing + Warehouse

Cognitive Operation Guidance – remote expert

Technician fixes issue through real-time guidance from remote expert

Extending the IoT Reach with IBM Cognitive Computing to Everything Smart Spaces – Interactive hotel rooms
