

EU-China IoTcooperation

Moving on from WhitePaper 2016

Philippe COUSIN

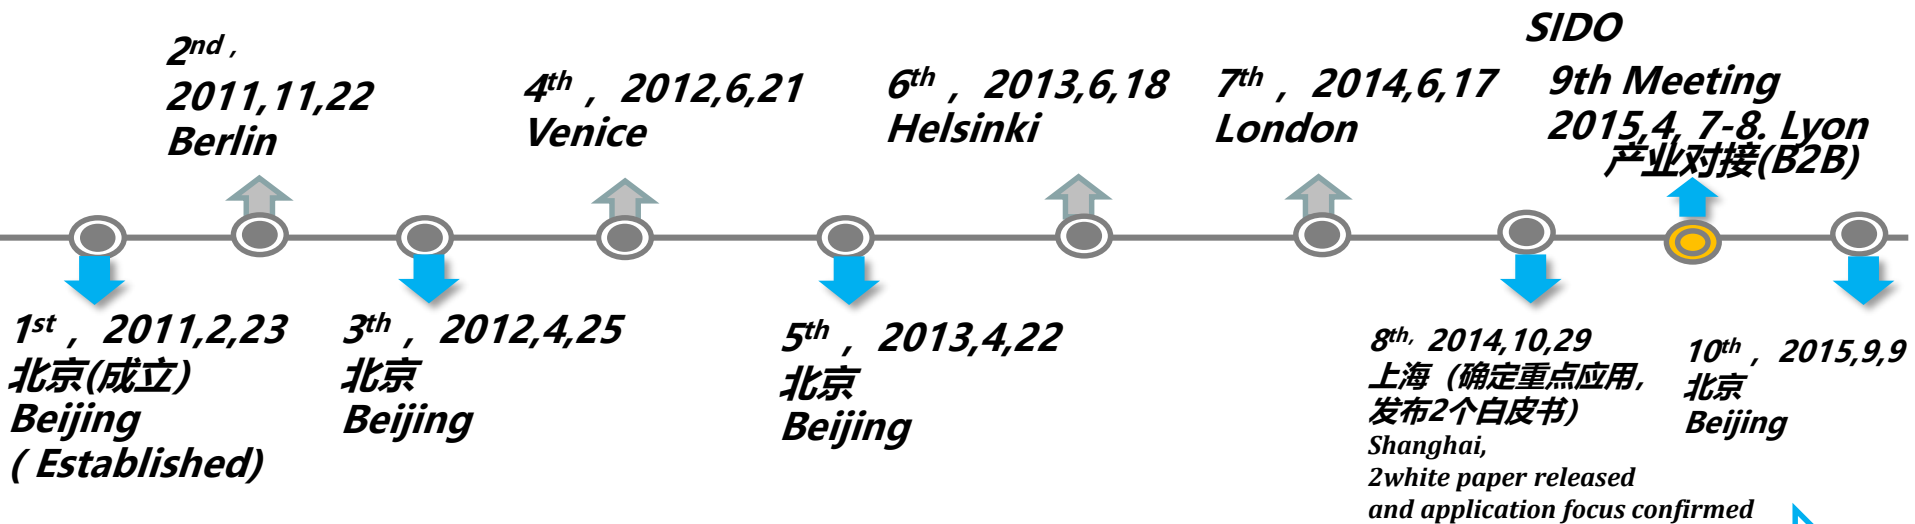

EGM, Exciting advisor

On-line workshop

May 3rd 2018

www.euchina-iot5g.eu

2011-2016: 10 Meetings have been held to promote EU-China IoT cooperation

从信息共享到联合发布白皮书、搭建产业合作平台
From Information Sharing to Joint White Paper and an industrial collaborative platform

3 EU-China IoT position papers released

- **架构 Structure** : < Expert Group Position Paper on Internet-of-Thing Architecture>
- **标识 Identification** : < EU-China Joint White Paper on Internet-of-Things Identification>

Joint White Paper Released at the Opening Ceremony of Shanghai International IoT Conference 2014

- **Semantic Interoperability**: EU-China position paper on Semantic Interoperability

Summary of cooperation 2011-2016

EU-China IoT Advisory Group

EU-China Joint White Paper on the Internet of Things

Date of publication: January 2016

Table of Content

1

The latest development of the IoT in China

2

Latest development of the Internet of Things in the EU

3

Common challenges

4

Development of the Internet of Things in the future

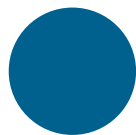

5

EU-China cooperation proposal

6

Conclusion

China : Why IoT so important ?

智能制造 Intelligence Manufacturing

智能化生产、网络化协同、规模化定制、服务化转型

Intelligent Production, Networked Collaboration, Scale Customization and Service Transformation

德国工业4.0

Industrial 4.0

美国工业互联网

Industrial Internet

中国信息化与工业化深度融合

convergence of Informatization and industrialization in China

工业物联网 Industrial IoT/CPS

物联网与社会发展、民生服务和中国的城镇化进程

IoT, Social Development, Public Service and China's Urbanization

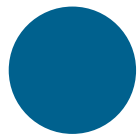

IoT Development in china

- Low layer- CPS mapping virtual <-> physical world
 - Industrial IoT
 - Smart Farming
 - Smart grid
- Applications-
 - Smart cities – urban management
 - transportation –
 - Security
 - Health

" Major Chinese internet companies have entered the field of IoT through wearable intelligent terminals, smart home, mobile health care, IoV, security, and other businesses, and have made rapid development in some of these areas."

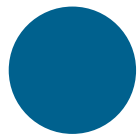

IoT in EU: importance of policies

- the **monitoring of innovation performance**
- the development of policies to **foster the broad commercialization of innovation,**
- the development and coordination of policies to **accelerate the uptake of advanced manufacturing technologies**

*" The Internet of Things is a key growth area
for the European Member States."*

EU:IoT trends and standards

- Technologies:
 - Platforms
 - Big Data
 - Semantic technologies
 - 5G
 - Cloud computing
- Standards
- Demand driven IoT deployment

Common challenges

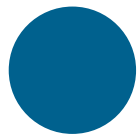

- Business models and new way of cooperation
- Interoperability
- Technical environment
- Trust
- Societal environment

Development of IoT in the future

1. Towards a hyper connected society
2. Massive and secure IoT deployments enabled by 5G
3. Benefit from other technology fields
4. Fusion of IoT, big data , cloud computing and generic connectivity
5. Automated vehicle
6. E-health and smart living
7. Smart farming and food safety
8. Industrial IoT
9. Focused zones in smart cities
10. Retail

EU-China cooperation proposal

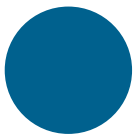

- Policy level cooperation (eg R&D coop.)
- Technical cooperation (eg twinning activities)
- Standardisation
- Market cooperation (eg AIOTI <-> Chinese IoT alliances, joint market analyses, ..

Next steps : post 2016

- Update the white paper in particular
 - The common challenges
 - The topics of common interest
 - From other contributions and suggestions
- Define a short action plan
- Involve interest parties (eg set up a WG03 sub-group with telcos). Contributions are welcome
- Update the 3 position papers (sept ?)

谢谢

Thank you
