# The IOTEC Project. Main results

## What's IOTEC?

IOTEC is an interregional Platform, with free access for the promotion of IoT technologies in companies, which was born within the framework of the Interreg PocTep project of the same name

# The IOTEC Project. Main results

## Participants

COORDINATOR

*The IOTEC project* has almost 50 associate members too

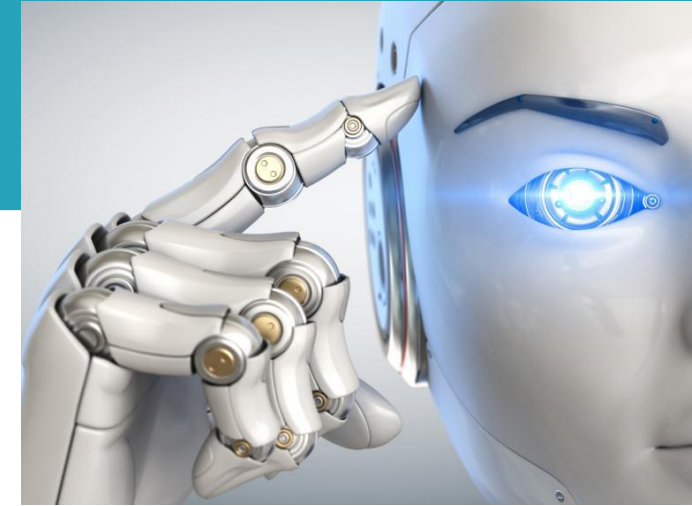

# The IOTEC Project. Main results

## Goals

- Foster the specialization of researchers in IoT, generate knowledge in this area and promote the processes of technology transfer. Also, to provide researchers with better conditions for the generation of knowledge
- Assit factories, focusing specifically on two parts: SMEs working in the ICT field; and innovative industrial SMEs
- Create an interregional plan of action in R & D and generate a highly qualified ecosystem for future IoT projects, providing added value as well as promotion and difusión activities in IoT technologies

# The IOTEC Project. Main results

## Workplan I

1. Study and development of IoT technologies
2. Transfer of IoT technologies to the ICT SME sector
3. Transfer of IoT technologies to the sector of innovative industrial SMEs

# The IOTEC Project. Main results

## Workplan II

4. Establishment of an interregional plan of action in R&D and promotion of IoT technologies
5. Management and Coordination
6. Communication

# The IOTEC Project. Main results

## FORUM

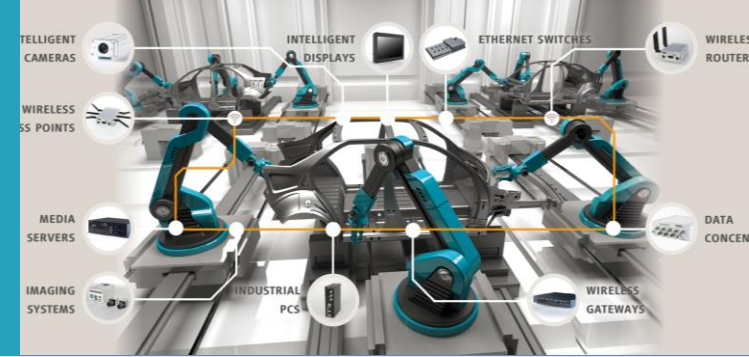

A fundamental pillar of the project is the FORUM, where companies and professionals meet and offer their services and requests for IoT technologies

### FORUM

To participate in the Forum, click "Join" and register. If you already have an account, access "Participate" and Log In.

# The IOTEC Project. Main results

## What could we achieve with IOTEC Forum?

More than 60 regional SMEs investing in R&D in order to obtain new ICT products and services in IoT

An ecosystem of pilot work in the R&D of IoT technologies with all the involved actors (public administration and public and private Spanish and Portuguese stakeholders)

# The IOTEC Project. Main results

**And what have we achieved overall?**

Study and development of IoT technologies... *i.e.*

Workshop Google Cloud Platform

Workshop Onesait Platform

# The IOTEC Project. Main results

## And what have we achieved overall?

Transfer of IoT technologies... *i.e.*

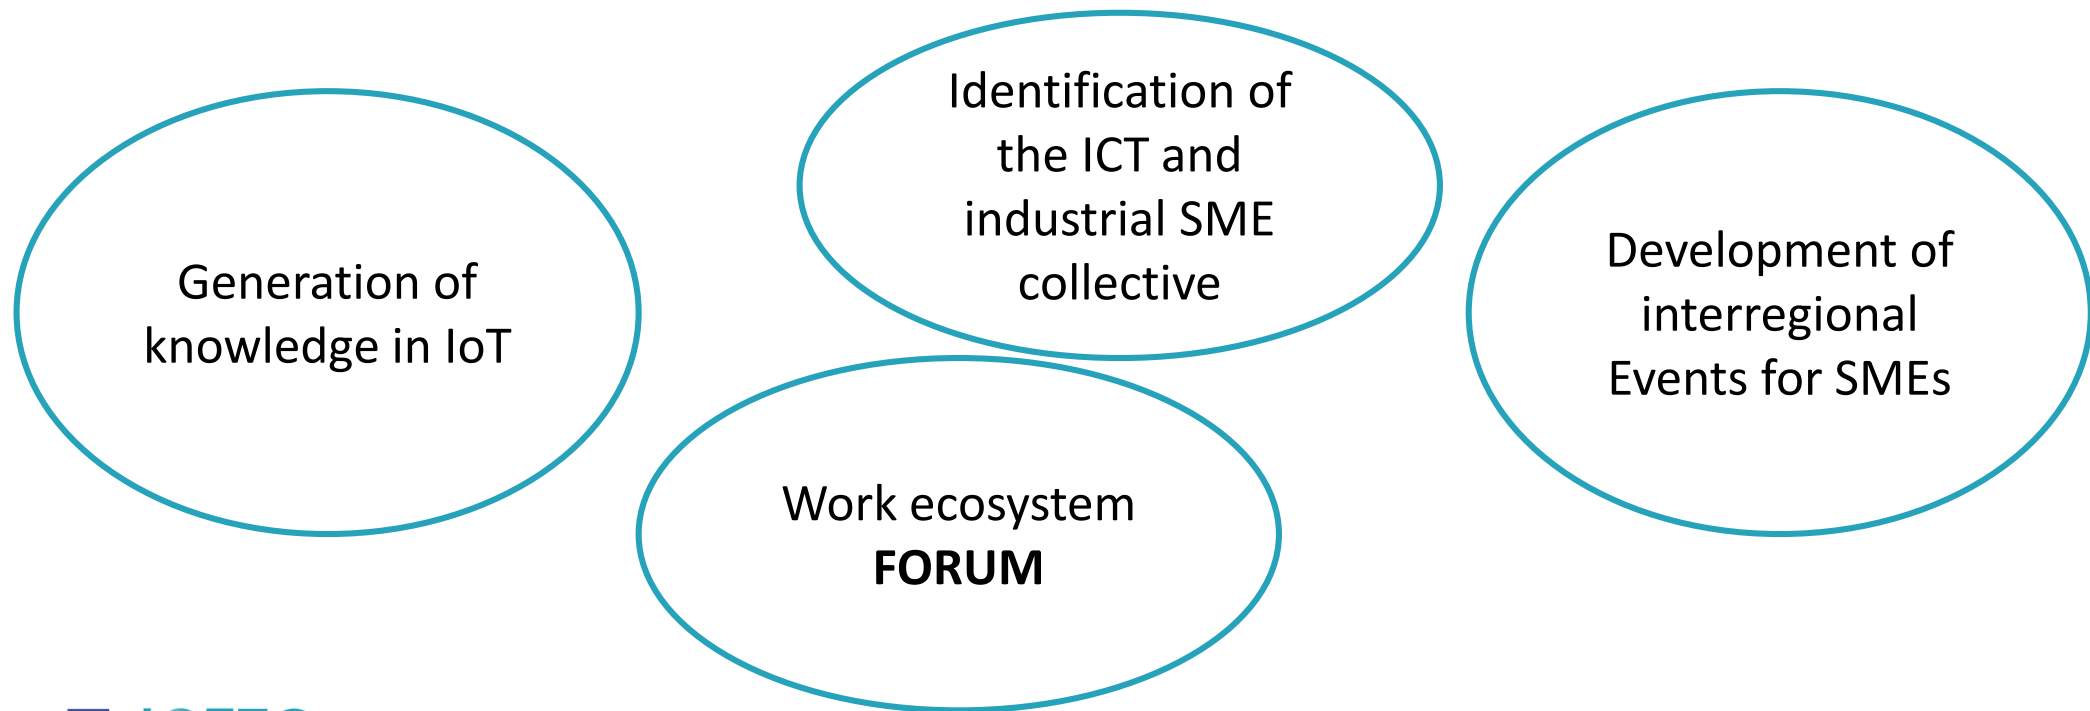

*II Industry 4.0 Congress*

# The IOTEC Project. Main results

And what have we achieved overall?

And the creation of a coordinated plan...

# The IOTEC Project. Main results
